STABILO Ink and Lead Compliance Statement with Ecological Criteria

All STABILO products listed below do not require to the best of my knowledge a classification in one or more of the following categories for chemical substances:

1. Very Toxic (T+)
2. Toxic, dangerous for health (T)
3. Very flammable (F+)
4. Carcinogenic, Reprotoxic, Mutagenic (CMR class 1 or class 2)
5. Corrosive (C)
6. Explosive (E)
7. The products listed below don't contain Cadmium, Antimony, Lead, Chrome VI, mercury, arsenic and selenium except as negligible contamination.
8. The content of the phthalates DINP, DEHP, DBP, DIDP, DNOP, and BBP is in total less than 0.1%.
9. The inks do not contain Volatile Organic Components except:
 - for ballpoint, rollerball gel or liquid ink: Benzyl alcohol (CAS 100-51-6), 2-phenoxyethanol (CAS 122-99-6), propylene glycol (CAS 57-55-6), ethylene glycol (CAS 107-21-1),
 - permanent markers and board marker pen: Ethanol (CAS 64-17-5), isomers 1 and 2 of propanol (CAS 71-23-8 et 67-63-0), and methoxypropanol (CAS 107-98-2),
 - for coloring fiber tips and highlighters: diethylene glycol (CAS 111-46-6) and ethylene glycol (CAS 107-21-1),
 - or solvents not present in this list which are less harmful than the ones listed above.
