Material-Data sheet

Product	Multipurpose labels
Material code	2436

Facematerial	
Description	Matt, white woodfree machine finished paper, providing good opacity. The paper is based on ECF pulp.
Thickness	72 µm
Grammage	73 g/m²

Adhesive	
Description	Acrylic water borne
Performance	Semipermanent adhesive. Not recommended for labelling PVC or acrylic surfaces.
Coating weight	21 g/m²

Liner	
Description	One side silicon coated kraft paper, yellow
Thickness	80 µm
Grammage	80 g/m²

Laminate	
Thickness	168 µm
Grammage	174 g/m²
Service temp.	0°C bis +80°C
Min. application temp	5°C
Optimal storage conditions	23°C / 50 % r.h.

Packaging	
Material	Flat packaging and dispenser: GN4 250 g/m²
	Small packaging: coated wood free paper 250 g/m², OPP foil 20µm

Recycling	
Face / liner	All components use environment friendly components. The liner is neutral, does not contain dangerous or water contaminating components and can be added to the normal paper recycling process
