	Refill	15.20	x 12.70	Height x Diameter(cm)	0.25
	Sheet	15.20	x 30.40	Length x Width(cm)	

Product Description

Certain controlled tasks require very specific wiping products and dispensing systems. With this in mind, expertise and wiping technology was applied to create a premium-quality task-specific range that can help maximise efficiency and productivity while reducing wiping and solvent costs. Kimtech® Wettask™ DS wipers for solvents are designed for use with the Wettask™ system wiper roll dispenser bucket, to enable you to clean and disinfect without sprays. The refillable, airtight wiping system holds these hygienic dry wipes to which you can add your chosen chemical or disinfectant. The system's unique self-closing lid eliminates the risk of cleaning wipes drying out and losing disinfecting effectiveness, helping to control the costs of disinfectants and sanitiser and improving safety by reducing spills. Perfect for infection control in busy healthcare environments and resistant to mould and bacteria, these large, perforated disposable cleaning wipes are ideal where hygiene and safety is of key importance. These Kimtech® Wettask™ cleaning wipes have been tested as compatible for prolonged, fully saturated use with peracetic acid, hydrogen peroxide, methyl ethyl ketone, isopropanol, acetone, bleach (sodium hypochlorite) and quats (quaternary ammonium compounds). Always follow manufacturers' instructions for dilution, application and contact time. These disposable industrial wipes are compatible with Kimtech® Wettask™ system wiper roll dispenser bucket (product code 7919). Each individual cleaning wipe measures 15.2 cm (L) x 30.4 cm (W). 6 Rolls x 140 White Cleaning Wipes (840 Total)

Product Features
