

SYNSATION™ PF

A COST-EFFECTIVE ALTERNATIVE TO LATEX FOR LOW-RISK SITUATIONS

Today's healthcare professionals are aware of the risks of allergic reactions associated with natural rubber latex, for themselves as well as for their patients.

In order to minimise these risks, many healthcare professionals inside and outside the hospital environment have turned to synthetic gloves.

Ansell has developed a synthetic examination glove which offers a safe and effective alternative to natural rubber latex.

Made of vinyl (polyvinyl chloride), the external surface of this beaded glove provides good instrument grip, while the internal surface allows easy and fast donning.

This examination glove, CE Marked as Class I Medical Device, is additionally certified and CE Marked as Category III Personal Protective Equipment, ensuring more consistent quality and providing protection for a wide range of applications.

PRODUCT DESCRIPTION

Material	Polyvinyl chloride (Vinyl)
Colour	Translucent
Shape	Ambidextrous
Cuff	Beaded
External Surface	Smooth
Internal Surface	-
