

PHILIPS

Foot control

For analog systems

3 pedal design

3.5 mm plug

LFH2210

Transcription made easy

with a Philips foot pedal

The ergonomic design of the new Philips foot pedal range sets new standards in terms of usability in the professional dictation arena. The development is based on detailed research into the movements made during transcription. Transcriptionists can stop and start playback with only a slight movement of the heel, and without lifting the foot unnecessarily, which both increases efficiency and makes the device a pleasure to work with.

Top performance

- Anti-slip bottom elements keep the foot control in the right place

Designed for professionals

- Ergonomic design for professional use and outstanding comfort
- Slim design for minimized physical strain due to less foot movement

No 1 in SPS global

Highlights

Anti-slip bottom

Equipped with anti-slip bottom elements, the foot pedal always stays in the right place.

Ergonomic design

The foot pedal was developed in cooperation with hospital ergonomists and professional end users to ensure a perfectly smooth transcription process with minimal physical strain.

Slim design

Transcriptionists can stop and start dictations with only slight movements of the heel, and without lifting the foot unnecessarily, which both increases efficiency and makes the device a pleasure to work with.

Versions

LFH2210
