Text of catalog:

They are completely new, innovative and unique products of high quality.

Transfers are not stickers. They offer a superior quality by creating the illusion to be directly painted on the surface of the wall. They do not present the same potential problems of stickers such as peeling corners normally due to exposure to dust and general wear and tear.

The ink used which is resistant to UV light stays strong and will not fade for many years of use.

Transfers are very quick and easy to both apply and remove without damaging the wall surface. They are applicable on any smooth surface, including walls, wallpaper, glass, tiles, furniture etc.)
