LOGI BOLT USB RECEIVER - N/A - EMEA

Verkaufsgründe

- Full encryption and secure connections only
- Cut through congestion
- Two ways to connect
- Next-level compatibility
- Plug-and-play convenience

Produktmerkmale

Full encryption and secure connections only

Logi Bolt is a cutting-edge wireless protocol,engineered to meet rising enterprise security expectations. It combines Bluetooth Low Energy wireless technology Security Mode 1,Security Level 4 - sometimes called U.S. Federal Information Processing Standards (FIPS) Mode - with additional Logitech security features designed to reduce vulnerability when devices are paired to a Logi Bolt USB receiver.

Cut through congestion

Fewer interruptions,greater productivity. Logi Bolt is engineered for reliable connections,even in wireless environments congested with interference from Wi-Fi access points or surrounding wireless devices. The Logi Bolt USB receiver provides a robust,drop-off-free connection up to 10 meters (33 feet) - with up to 8x lower latency than other commonly deployed wireless protocols for enterprises.

Two ways to connect

When it comes to wireless,users want the flexibility to connect the way they want. With Logi Bolt,you can rest easy knowing those connections are always reliable and secure. Users can either connect via Bluetooth Low Energy wireless technology or via the tiny Logi Bolt USB receiver,locking in an FIPS-secure connection even in congested wireless environments.

Next-level compatibility

Logi Bolt works with just about every operating system and platform including - but not limited to - Windows,macOS,Linux,Chrome OS,Android,iOS and iPadOS. In fact,Logi Bolt devices are more universally compatible than most leading peripheral brands on the market.

Plug-and-play convenience

Logi Bolt products are pre-paired to their Logi Bolt USB receivers in the factory,so set-up is truly a plug-and-play experience - virtually eliminating any need for Help Desk support. Plus,people can pair up to six. Logi Bolt wireless mice and keyboards to a single Logi Bolt USB receiver - saving precious USB port space and eliminating the need to move mice and keyboards between different work setups.

Hauptmerkmale

Product Description	Logitech Logi Bolt - wireless mouse / keyboard receiver - USB
Device Type	Wireless mouse / keyboard receiver
Interface Type	USB
Dimensions (WxDxH)	1.44 cm x 0.66 cm x 1.84 cm
Weight	2 g
OS Required	Linux,Google Chrome OS,Windows 10 or later,Apple macOS 10.14 or later
Manufacturer Warranty	1-year warranty
Designed For	MX Keys Combo for Business
