

Technical specification Bata Industrials

	Cool MS 2	
		COL SOCKS In warmer environments, Cool socks from Bata provide feet with a pleasantly cooling sensation. All models from this collection contain Pro-Cool®, which easily draws perspiration from the foot via the outer side of the sock to the interior lining of the shoe. Feet remain nicely cool and dry. The combination with other materials (fibres and yarns) and the addition of a variety of protective zones ensure unique functional and comfort-enhancing characteristics. The blue line on the side of the sock shows that it is a Cool sock.
Model	Cool MS 2 black	
Article number	131510102	
Al ticle humber		
Colour	Black	
Colour	Black	
Colour ESD	Black yes	The very latest technologies have been incorporated into this strong, moisture-regulating
Colour ESD	Black yes 35% cotton	sock. SeaCell active for example: a cellulose fibre with integrated algae that feed your feet with proteins, vitamins and carbohydrates.
Colour ESD	Black yes 35% cotton 25% Pro-Cool (Polyester)	 sock. SeaCell active for example: a cellulose fibre with integrated algae that feed your feet with proteins, vitamins and carbohydrates. Thanks to optimal ventilation, feet remain cool and dry, with little chance of blisters forming
Colour ESD	Black yes 35% cotton 25% Pro-Cool (Polyester) 24% polyamide	 sock. SeaCell active for example: a cellulose fibre with integrated algae that feed your feet with proteins, vitamins and carbohydrates. Thanks to optimal ventilation, feet remain cool and dry, with little chance of blisters forming Super-soft yet strong, invigorating sock with a great fit Extra protection and comfort due to the pleasant towelling sole
Colour ESD	Black yes 35% cotton 25% Pro-Cool (Polyester) 24% polyamide 14% Amicor TM pure (acrylic)	 sock. SeaCell active for example: a cellulose fibre with integrated algae that feed your feet with proteins, vitamins and carbohydrates. Thanks to optimal ventilation, feet remain cool and dry, with little chance of blisters forming Super-soft yet strong, invigorating sock with a great fit
Colour ESD	Black yes 35% cotton 25% Pro-Cool (Polyester) 24% polyamide 14% Amicor TM pure (acrylic) 1% Lycra (elastane) 1% Bekinox (metal fibre) 35-38	 sock. SeaCell active for example: a cellulose fibre with integrated algae that feed your feet with proteins, vitamins and carbohydrates. Thanks to optimal ventilation, feet remain cool and dry, with little chance of blisters forming Super-soft yet strong, invigorating sock with a great fit Extra protection and comfort due to the pleasant towelling sole Antibacterial fibres and revitalising algae keep unpleasant smells at bay and keep feet feeling fit Reinforced zones around the heel and toe for extra durability
