

Technical Information

Product name **Skyvell Gel**
An Applied Chemicals International product

Description
Skyvell Gel is a unique blend of natural essential oils. Skyvell Gel is inherently biodegradable according to OECD 301F 853%) and effectively eliminates all odors without leaving behind any other fragrance. Only the pleasant smell of fresh air remains.

Uses
Skyvell Gel gently and effectively removes odors from the following:

- Food
- Body fluids
- Chemicals
- Mold
- Smoke
- Animals
- Trash
- Paints
- And much more

It is most frequently used in the following locations:

- Hospitals
- Nursing homes
- Restaurants
- Hotels
- Sanitary facilities
- Fitness and sports facilities
- Garages
- And much more

Typical Characteristics
Please refer to our current safety data sheet for detailed information about the typical product characteristics. We recommend using the product within 12 months.

How to use
Remove the foil under the lid to allow the continuous release formulation of Skyvell Gel to work round-the-clock, providing constant odor elimination, day and night, 24/7. The gel's active substance gradually volatilizes completely in the air. The product can be transferred to several flat, open containers (minimum width of 100 mm). The container should be refilled as needed.
With normal airflow and room temperature, the gel can be used in the jar for a period of approx. 30 days before the jar should be replaced or replenished.
We recommend placing a fan in front of the gel container to increase the odor-fighting capability of the gel in case of more intensive or persistent odors.

Specifications

Physical form	viscous
Color	whitish, depending on the harvest of the oils, as well as after opening, light yellow
Odour	aromatic
Solubility	in any ratio miscible with water
Recommended storage temp.	5 -28°C, keep dry
Shelf life	36 months (in case of proper storage)

Storage

Protect from frost, heat and direct sunlight. Store in cool, dry conditions in well-sealed receptacles.

Packing

Jar 250g / 500g / bucket 10kg
Other sizes available upon request.

Technical Service

Please contact our Technical Service Department at any time if you have any questions about how to use the product. This also applies to the planning and supply of suitable manual as well as semi- and fully automatic systems.

Environmental and Safety Information

Based on our data, the product is not classified as hazardous according to EC directives. Therefore, no safety data sheet is required by law for distribution and use. However, the usual precautionary measures should be observed when handling chemicals. Please refer to our current safety data sheet for detailed information about the correct handling and application of our product. This document is available on request

Guarantee

The information provided in this leaflet is not a product specification. This data sheet was created according to the current state of knowledge. Errors cannot be ruled out despite all care taken to ensure information is correct and up to date.
