Life Cycle Assessment

The methodology in this report is based on ISO 14040

3334754 (sold in CH)

Summary

01 | Methodology

02 | Results

01

Methodology

Environmental Impact Assessment

Functional unit	<p>The functional unit is a quantified performance of a product system for use as a reference unit. One of the primary purposes of a functional unit is to provide a reference to which the input and output data are normalized (in a mathematical sense).</p> <p>The functional unit of this analysis is "4 set(s) of bound pages of paper for the purpose of writing".</p>
Impact Indicator	<p>The impact is measured through the "IPCC 2013 GWP 100a" method.</p>
Electricity impact calculation method	<p>Following guidelines from the GHG Protocol, the impact of electricity is calculated using the location-based approach. This means that the emission factors used represent the average annual carbon intensity of the power grid in the country the processes take place in.</p>
Hypothesis	

Environmental Impact Assessment

System Boundaries

The scope of this research includes the complete lifecycle of a notebook from raw material extraction to disposal options for each material, which is the cradle-to-grave perspective.

Exclusions

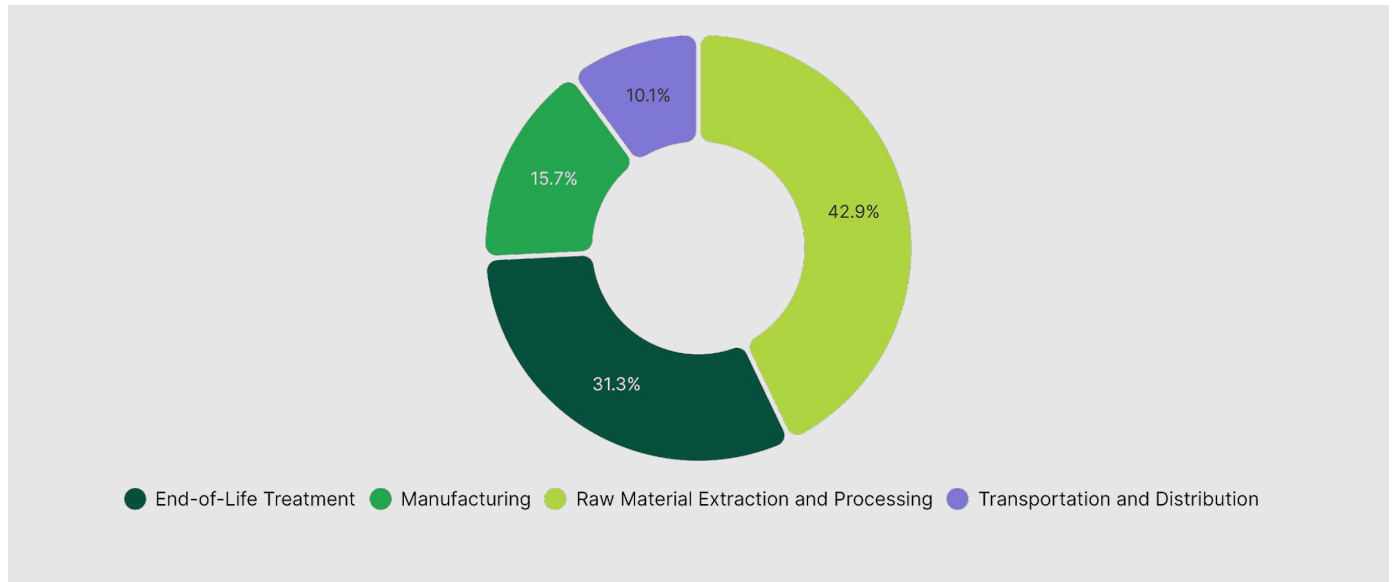

The impact of secondary packaging and writing utensils are excluded from this assessment.

02

Results

3334754 (sold in CH)

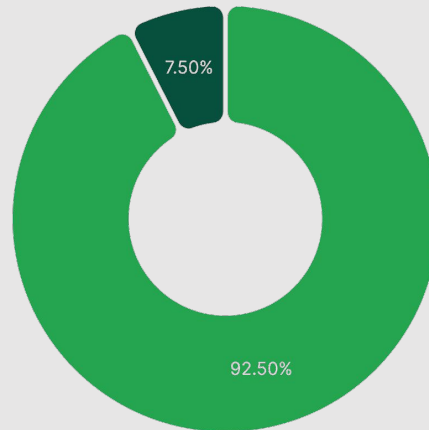

Climate Change

Step	Impact (g CO ₂ eq)	Percentage (%)
Raw Material Extraction and Processing	375.6	42.88 %
End-of-Life Treatment	274.58	31.35 %
Manufacturing	137.35	15.68 %
Transportation and Distribution	88.46	10.10 %
TOTAL	875.99	100.00 %

3334754 (sold in CH)

Climate Change - Raw Material Extraction and Processing

● Sourcing of raw material (adhesive) ● Sourcing of raw material (bleached kraft paper)

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
Sourcing of raw material (bleached kraft paper)	1	0.7	347.43	92.50 %
Sourcing of raw material (adhesive)	2	5.17 · 10 ⁻³	28.17	7.50 %
TOTAL			375.6	100.00 %

3334754 (sold in CH)

Climate Change - Manufacturing

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
Electricity usage during material transformation (bleached kraft paper)	3	0.25	109.1	79.44 %
Natural gas usage during material transformation (bleached kraft paper)	4	0.13	24	17.48 %
Electricity usage during material transformation (adhesive)	3	9.59 · 10 ⁻³	4.24	3.09 %
TOTAL			137.35	100.00 %

3334754 (sold in CH)

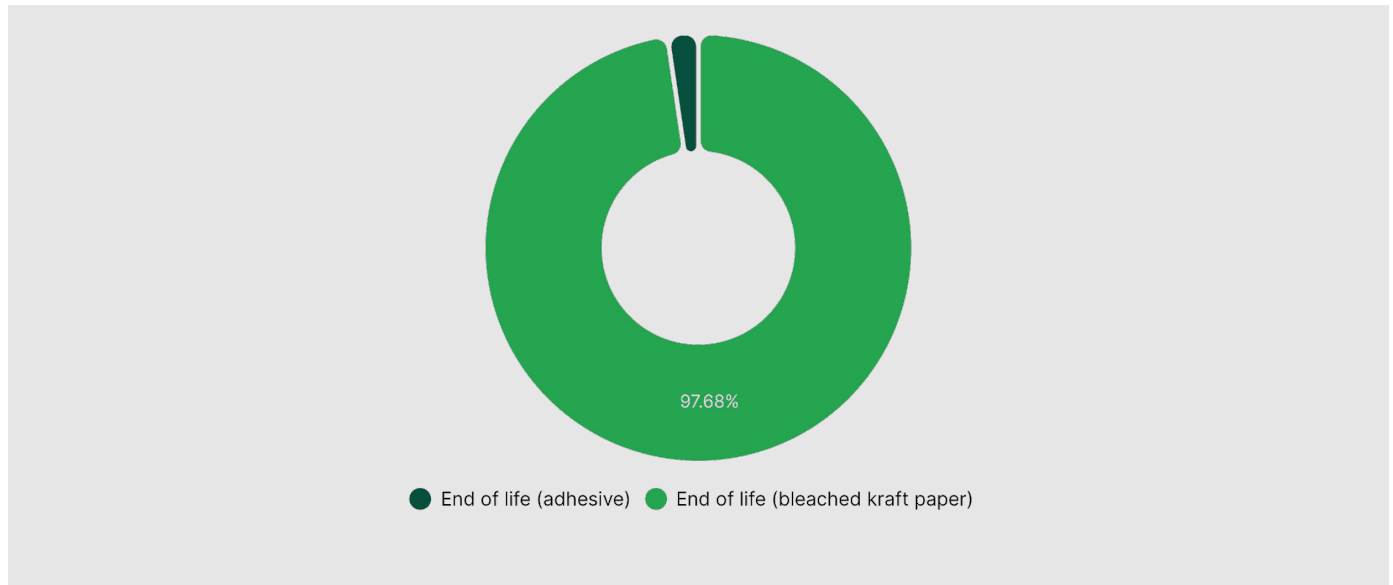

Climate Change - Transportation and Distribution

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
Freight	5	0.47	88.46	100.00 %
TOTAL			88.46	100.00 %

3334754 (sold in CH)

Climate Change - End-of-Life Treatment

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
End of life (bleached kraft paper)	7	0.47	268.22	97.68 %
End of life (adhesive)	6	4.7 · 10 ⁻³	6.36	2.32 %
TOTAL			274.58	100.00 %
