01

Methodology

Environmental Impact Assessment

<p>Functional unit</p>	<p>The functional unit is a quantified performance of a product system for use as a reference unit. One of the primary purposes of a functional unit is to provide a reference to which the input and output data are normalized (in a mathematical sense). The functional unit of this analysis is "24 set(s) of bound pages of paper for the purpose of writing".</p>
<p>Impact Indicator</p>	<p>The impact is measured through the "IPCC 2013 GWP 100a" method.</p>
<p>Electricity impact calculation method</p>	<p>Following guidelines from the GHG Protocol, the impact of electricity is calculated using the location-based approach. This means that the emission factors used represent the average annual carbon intensity of the power grid in the country the processes take place in.</p>
<p>Hypothesis</p>	

Environmental Impact Assessment

System Boundaries

The scope of this research includes the complete lifecycle of a notebook from raw material extraction to disposal options for each material, which is the cradle-to-grave perspective.

Exclusions

The impact of secondary packaging and writing utensils are excluded from this assessment.

02

Results

17229425 (sold in CH)

Climate Change

Step	Impact (g CO ₂ eq)	Percentage (%)
Raw Material Extraction and Processing	303.94	42.88 %
End-of-Life Treatment	222.19	31.35 %
Manufacturing	111.14	15.68 %
Transportation and Distribution	71.58	10.10 %
TOTAL	708.85	100.00 %

17229425 (sold in CH)

Climate Change - Raw Material Extraction and Processing

● Sourcing of raw material (adhesive) ● Sourcing of raw material (bleached kraft paper)

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
Sourcing of raw material (bleached kraft paper)	1	0.56	281.14	92.50 %
Sourcing of raw material (adhesive)	2	4.18 · 10 ⁻³	22.8	7.50 %

--	--	--	--	--

--	--	--	--	--

TOTAL			303.94	100.00 %
-------	--	--	--------	----------

17229425 (sold in CH)

Climate Change - Manufacturing

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
Electricity usage during material transformation (bleached kraft paper)	3	0.2	88.29	79.44 %
Natural gas usage during material transformation (bleached kraft paper)	4	0.11	19.42	17.48 %
Electricity usage during material transformation (adhesive)	3	7.76 · 10 ⁻³	3.43	3.09 %
TOTAL			111.14	100.00 %

17229425 (sold in CH)

Climate Change - End-of-Life Treatment

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
End of life (bleached kraft paper)	7	0.38	217.05	97.68 %
End of life (adhesive)	6	3.8 · 10 ⁻³	5.15	2.32 %
TOTAL			222.19	100.00 %
