## Product description

The 30-piece cutlery set offers you six menu forks, knives and spoons as well as cake forks and coffee spoons to match numerous dishes and courses. To help you find the set that suits your individual needs, WMF cutlery comes in a variety of designs. The 30 pieces are a good basis for daily dining and can be completed with further serving and complementary cutlery - for a perfect table culture.

Reduced pure and uncomplicated - with this claim WMF designer Peter Bäurle designed this model. And so the individual cutlery pieces are particularly appealing due to their simplicity: details were deliberately omitted, only the rounded edges are discreetly eye-catching. For the model, monobloc knives are manufactured whose curved blades offer good stroking volume. Thanks to its timeless design and a large selection of complementary pieces, the Boston cutlery is versatile and leaves a shiny impression with its polished surface.
