Proven splash resistance against hazardous chemicals

DESCRIPTION

- Further testing of the TouchNTuff® by a certified body on an even wider range of chemicals confirms that it resists a greater variety of industrial chemicals for longer periods than any other nitrile disposable gloves.

 Manufactured from nitrile, TouchNTuff® offers up to four times the puncture resistance of
- comparable natural-latex gloves, and three times the resistance of similar neoprene gloves.
 It contains no natural rubber proteins, which means no risk of Type I allergies for the
- wearer. Primary skin irritation studies and Insult Patch tests have also shown no evidence of risk from irritation or allergic contact dermatitis.

 With a unique "Thin Nitrile Technology" formulation, this glove offers easy donning and
- strong grip in wet or dry conditions.

 The glove is highly versatile and suitable for many different uses.
