

Product description

HSC utilises specialist enzymes and a multi surfactant degreasing system to cut through the toughest soils and make floors less slippery.

Core benefits

- Fast, enzymatic action quickly cuts through the toughest, grease and dirt
- Makes floors less slippery and hazardous
- Reduced use of hazardous ingredients owing to the inclusion of a VOC free, carbon neutral, plant derived solvent in place of traditional solvents
- Concentrated formula, reducing the cost per application.
- Advanced detergent/solvent/enzyme combination make an excellent choice for all round maintenance cleaning
- pH neutral and safe for all surfaces
- Contains a fresh and widely appealing fragrance which revives surfaces and leaves a long lasting pleasant odour

How does it work?

A powerful water based enzymatic cleaner that is safer for the user and the environment.

It combines with a heavy duty, quick breaking, multi-surfactant system to provide effective wetting, penetrating, soil cutting and anti-redepositing action which allows the quick emulsification and easy lifting of soils, dirt and grease from hard surfaces.

The product contains a plant derived, carbon neutral, VOC free eco-solvent which provides the benefit of extra solvency power when cleaning and effectively replaces the need for more conventional and hazardous solvents.

The tailored enzyme pack kick starts the breakdown of oily and greasy residues into shorter chain, more soluble molecules, allowing easier, faster removal of greasy deposits.

Regular use makes kitchen floors safer for workers, reducing slips.

Directions for use

Rinse area to be cleaned with plenty of water to help loosen dirt and grease.

Dispense 20-60ml dependent on soiling into a mop bucket and dilute up to 5 litres with clean water.

The product may be applied via machine or used for manual cleaning.

Product specification

Contains: fresh fragrance, water softener, multi-surfactant combination, product specific enzymes.

Pack Sizes:

1 Litre 5 litres
