

# Gum, Mark & Graffiti Remover

## Product Description

Gum, Mark & Graffiti Remover utilises a powerful, safe, eco-friendly, non-flammable organic solvent to remove chewing gum, adhesives, tyre and other black marks, graffiti such as ink, permanent marker/spray paint and nail varnish from a variety of surfaces

## Core Benefits

- 3 applications in 1 - provides a quick, versatile cleaning response
- Cost effective - ready to use, concentrated formulation
- Low odour and volatility - no chlorinated solvents or flammable alcohols, making it a safer alternative to traditional gum/mark & graffiti remover products
- Does not put the user at unnecessary risk, can be used safely in confined and enclosed areas
- Suitable for internal and external use
- Utilises innovative, low toxicity, environmentally friendly organic solvent produced from by products of a primary manufacturing process, thus avoiding the disposal burden of spent chemical waste on the environment
- Suitable for use on most surfaces when used as directed
- Removes gum, black marks such as tyre, pram and shoe scuffs, graffiti including felt tip pen, marker pens, ballpoint inks, spray paints and general inks
- Reduces CO<sub>2</sub>e by up to 85%

## How does it work?

By softening, lifting and holding the soil away from the surface, Gum, Mark & Graffiti Remover prevents further spreading action so soils can be quickly and easily wiped, scraped or rinsed away allowing for effective and complete removal.

## Directions for use

The product requires a period of contact with the soil, after which marks/deposits can be easily wiped/scraped away. Brush or clean the surface and spray neat product over the affected area. Allow the recommended contact time and rub surface with a hard brush, cloth or scraper to remove any gum, marks or graffiti. Wipe the surface dry with a cloth. Repeat as necessary. Test on a small non-critical area first. Always use as supplied.

### Gum Removal

Spray neat product over the affected area. For non vinyl floors such as tiles, concrete etc allow 3 minute contact time. Gently scrape the underside of the gum deposits with a plastic or metal scraper to lift residues from the surface. For vinyl floors allow 30 seconds contact time and use as above.

### Mark Removal

Firstly apply BioHygiene All Surfaces & Floor Cleaner to clean and remove any surface debris. Work on a small area at a time. Spray neat product sparingly over the affected area. For non vinyl floor such as tiles or concrete allow a minimum contact time of at least 3 minutes, wipe the area with a cloth or pad to remove the stain or go over the affected surface with a scrubber drier to complete the cleaning process and remove all black marks. For vinyl floors, allow 30 seconds contact time and use as above.

### Graffiti Removal

Coverage rates for graffiti removal vary significantly depending on factors such as: age, type and thickness of the graffiti, temperature, moisture, porosity, substrate and equipment used. For heavy duty graffiti removal a repeat application may be necessary to completely remove all traces of graffiti. Spray neat product liberally over the affected area. Allow a minimum contact time of at least 3 minutes and gently scrub the surface. Rinse as necessary or wipe clean.

## Product specification

Contains: Organic solvents, wetting and cleaning agents

## Environmental

- Local UK Production and supply chain reduces CO2e impact from transport
- Technologies are renewable and sustainable, sourced from plant extracts, fermentation, microbes and manufacturing by-products reducing CO2e and environmental toxicity
- Post Consumer Recycled bottles provide a circular life cycle reducing CO2e and removing physical plastic pollution
- Highly concentrated to reduce plastic, transport and storage costs and environmental impact
- Readily biodegradable (99% over <28 days)
- 0% manufacturing waste
- Not tested on animals
- Excludes all 'watch list' raw materials

## Safety & Storage

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet (SDS). Only for professional users/specialists. Store in original closed containers away from extremes of temperature.
