

Pro 952 Footrest

Compact footrest, adjustable with one foot for an ideal foot and leg support.

The Pro 952 footrest will help to improve your well-being during your workday. This footrest reduces the pressure on your legs and supports the blood circulation in your feet, knees, and thighs. Thanks to the height adjustable footboard, this footrest prevents dangling of your legs and compensate the height difference at your desk. The Pro 952 footrest has a compact size, is easy to adjust with one foot, is stable, and has a non-slip surface for a good grip of your feet. Prevent muscle strain and fatigue by supporting your legs at an optimum angle and height, and work more comfortable with the Pro 952 footrest.

Ergonomic background

Every VDU workstation should be perfectly adjusted to the user to enable a healthy and ergonomic way of working. This means that the office chair should ideally be adjusted to the person sitting on it. In addition, the optimal desk height is a basic requirement for an ergonomic sitting position. In situations where this is not possible, footrests can help to create a balance between the floor and the height of the table. In this way a footrest contributes to a better ergonomic sitting posture.
