

WEE- SCREEN®

Superior
Anti-Splash-Back
Performance

30-Day Fragrance
Output

Extra Flexible
Lattice Design

Bold Design with Unmatched Performance

The Wee-Screen sets new standards in urinal care with its unique bubble design, providing an effective 30-day solution for enhancing restroom hygiene. This advanced design not only optimizes fragrance delivery but also ensures superior splash-back control, keeping your washroom environment cleaner and more hygienic. The Wee-Screen's structured bubbles capture debris efficiently, reducing blockages and maintaining smooth water flow.

Engineered with an emphasis on performance, the Wee-Screen delivers a continuous fragrance output that enhances the experience, making it ideal for high-traffic areas.

The strips of EVA material weave together to create a strong lattice design, which makes the Wee-Screen less rigid, allowing it to flex into almost any urinal design without compromising longevity or durability.

BENEFITS

Effective 30-Day Solution

Provides up to 30 days of controlled fragrance release, ensuring lasting freshness and improved washroom.

Anti-Splash-Back Performance

Engineered to minimize splash-back and maintain a cleaner environment, reducing cleaning frequency.

Extra Flexible

Flexible lattice design adapts to various urinal shapes with ease, ensuring a secure fit and optimal coverage.

Debris Capturing Efficiency

Engineered to capture debris effectively, reducing the risk of blockages and maintaining smooth water flow.
