Small keyboard

The Ergo Compact Keyboard is a compact ergonomic keyboard. During simultaneous use of keyboard and mouse, the hands will always remain within shoulder width. This gives the shoulder and elbow naturally relaxed positions which will help prevent strain complaints such as RSI.

- The new way of working

The keyboard is thin and has a light keystroke, which causes a flat position of the wrists and reduces muscle tension. You can easily carry the Ergo Compact Keyboard around, making it ideal for the new flexible way of working.

- Plug and Play

Keyboard with USB connection is instantly ready to use: plug and play!
