

NOVAHO LENSES CLEANER - ANTI VAHO - ANTIGRASE

Properties :

Aqueous formulation specially created to avoid the formation of mist and fogging on any type of lens with long lasting effect.
Its formulation eliminates condensation caused by sweating, continuous use of the mask, high atmospheric humidity, steam from kitchens and bathrooms as well as perspiration produced by sports.
Free of ammonia and oil additives. It has a practical presentation in the form of a sprayer that can be comfortably carried anywhere. In addition to its anti-fog effect, it has a degreaser effect if rinsed off with a wet wipe.

Proandre, committed to the environment

How to use:

Glasses: Apply a drop of the product on each of the lenses. Using a dry wipe suitable for cleaning glasses, spread the product over the entire surface. Thus ensuring the formation of the anti-fog film. Several daily applications are recommended if the use of glasses is continued.

Protective masks and screens: Apply a quantity of product, proportional to the chosen surface, using a microfiber cloth. Spread the product over the entire surface.

Recommended Uses:

Spectacle lenses, diving goggles and masks, individual protection screens, approved work goggles ... (Applicable on glass and plastic). Especially recommended for fogging up glasses caused by continued use of the mask.

Precautions:

It is recommended to use a suitable cloth for cleaning glasses and not use paper or other types of materials other than those recommended.

Packaging capacity : 40 ml

Expositor capacity : 40 units

Physical form: Liquid/Gel

Color: Colorless

Odor: Characteristic

Specific weight: 0.980 - 1,010 g/ml a 20°C

Water solubility: Miscible

Environment:

The NOVAHO Sprayer is harmless to the environment, it doesn't contain propellant gas and is biodegradable.

Composition:

Aqua, Sodium Laureth Sulfate, Cocamide DEA, Cocamidopropyl Betaine, Methylchloroisothiazolinone.
