About This Manual

Manuals for the Scanner

Documentation for this scanner consists of the following manuals.

Before Use

Make sure to read this information before setting up the scanner.

Setup Guide

This manual describes the procedures for setting up the scanner for use. Please follow the procedures in the Setup Guide to set up the scanner. This manual is stored on the supplied Setup Disc as an electric manual.

User Manual (this manual)

This manual contains complete explanations for operations on the scanner. This manual is stored on the supplied Setup Disc as an electric manual.

Windows

The User Manual will be registered to the following location in the start menu after you install the software on the Setup Disc.

In Windows 8.1 / 8, it is registered in the following location.

Mac

After the software is installed from the setup disc, the User Manual is shown below.

/Applications/P-208II User Manual

Symbols Used in This Manual

The following symbols are used in this manual to explain procedures, restrictions, handling precautions, and instructions that should be observed for safety.

Indicates a warning concerning operations that may lead to death or injury to persons if not performed correctly. To use the machine safely, always pay attention to these warnings.

Indicates a caution concerning operations that may lead to injury to persons, or damage to property if not performed correctly. To use the machine safely, always pay attention to these cautions.

Indicates operational requirements and restrictions. Be sure to read these items carefully to operate the machine correctly, and avoid damage to the machine.

Indicates a clarification of an operation, or contains additional explanations for a procedure. Reading these notes is highly recommended.

Features of the Scanner

The main features of the P-208II document scanner are described below.

Compact Size

The scanner has a compact size of 312.5 mm (W) x 40 mm (H) x 56.5 mm (D) (12.3" x 1.57" x 2.22") when the document feed tray is closed. The size of the scanner with the feed tray open is 312.5 mm (W) x 40 mm (H) x 89.5 mm (D) (12.3" x 1.57" x 3.52").

Bus-Powered

Using the bus powered USB2.0 drive, you can scan up to 8 sheets per minute (A4 size, one- or two-sided scan at 200dpi).

Auto Start Function

The CaptureOnTouch Lite software that comes preinstalled in the scanner can be started by turning ON the Auto Start switch on the rear panel. Connecting a computer to the scanner enables scanning even when the driver is not installed.

Auto Power ON/OFF

This feature automatically turns the power ON or OFF when the feed tray is opened or closed.

• Equipped with Feeder

Up to 10 pages of a document can be loaded and then fed continuously, or one at a time.

Wi-Fi connectivity

By connecting the optional WU10 to the scanner, you can operate the scanner and load document from a PC or other device with a wireless connection. You can also send scanned data directly to a smartphone, tablet PC, or other smart device with a wireless connection.

CaptureOnTouch

When the bundled CaptureOnTouch software is installed, you can perform scanning with a variety of scanning methods, ranging from a normal scan, to a scan that involves a series of steps and which is performed by registering a job.

• Color and Grayscale Support

The scanner is capable of scanning a document in 24-bit color or 256-level grayscale.

Two-Sided Scanning

The scanner supports one-sided and two-sided scanning. Using the skip blank pages function enables you to scan without worrying about whether to scan one side or both sides of a document because scanned images of blank pages are not saved.

Auto Color Detection

The scanner detects whether the scanned document is in color, grayscale, or black and white, and saves the image accordingly.

Full Auto Mode

A Full Auto Mode is provided in CaptureOnTouch Lite, CaptureOnTouch and scanner driver to allow scanning under automatically determined conditions. Scanning conditions such as the color mode and page size are set automatically based on the document being scanned.

Auto Resolution Detection

When enabled in the CaptureOnTouch Lite, CaptureOnTouch or scanner driver settings, this function detects the content of documents and determines the scanning resolution automatically.

Document Size Auto Detection

This feature enables automatic detection of the page size of a scanned document. The space around the edges of documents can be omitted during scanning, even for non-standard size documents.

Deskew

Even if a document is slanted when fed into the scanner, the scanned image can be straightened.

Text Enhanced Mode

Advanced Text Enhancement II is provided to improve the readability when scanning documents in which the background is uniform and both the text and background are light.

*This feature may not work effectively for some documents

Picture Mode

The [Apply corrections suitable for photographs] features compensates for underexposed and overexposed images for photoquality scans with finer gradation.

Prescan

This feature allows you to scan just the first page of a document, confirm the scanned image and adjust the brightness and contrast, and then scan the remaining pages of the document.

Scan First

Pressing the Start button on the scanner automatically starts CaptureOnTouch Lite or CaptureOnTouch, which allows simple scanning by following the instructions on screen.

Auto Detection of Document in Feeder

An automatic start function is provided for detecting when a document is placed in the feeder and then starting scanning automatically.

Depending on the bundled software you are using, all of the preceding features may not be available.

Names and Functions of Parts

This section describes the name and function of each part. Make sure to read this section and familiarize yourself with the parts of the scanner before using the scanner.

Front View/Right-Side View

(1) Feeder Cover

Open this when cleaning the scanner.

(2) Document Feed Tray

This tray is for feeding documents. Open it when scanning documents.

(3) Document Guides

These guides ensure documents are fed straight (one on the left and right sides). Slide the guides when loading a document, and then align them to both sides of the document to be scanned.

(4) Feed Inlet

Insert the document to be scanned.

(5) Start Button

٢

Press this button when you want to start scanning the document loaded in the feed tray.

When the power of the scanner is ON, this button lights and indicates the status of the scanner as shown below.

| Start button status | Meaning |
|------------------------|--|
| Lit | The power of the scanner is ON. |
| Flashing | Paper is jammed. A double feed has been detected and the scanner has stopped. The top unit is open. Another scanner error has occurred. |

(6) USB Connector

Connect the USB cable supplied with the scanner.

The Start button may blink slowly when the USB cable is connected and the feed tray is opened. When this occurs, wait for the power indicator to stop blinking and light steadily before using the scanner.

Back View

- Auto Start Switch
 Use this switch to change the operation mode of the scanner.
- (2) Eject Outlet

This outlet is for ejecting documents when scanning is completed.

(3) Theft Prevention Hole (Security Slot) Attach a key chain, etc. here to prevent the scanner from being stolen.

This scanner does not have a power switch. For details, "Power Supply" on p.7

Power Supply

The power of the scanner is designed to turn ON when the feed tray is opened or closed. To turn the power ON or OFF, operate the scanner as described below.

Turning ON the Power

1 Open the document feed tray.

The scanner turns ON, and the Start button lights.

IMPORTANT

The Start button may blink slowly when the USB cable is connected and the feed tray is opened. When this occurs, wait for the power indicator to stop blinking and light steadily before using the scanner.

Turning OFF the Power

1 Close the feed tray.

The scanner turns OFF.

- If the document feed tray is pulled out, set it back to its original position. See "Loading a document" on p.25 for how to close the document feed tray.
- When not using the scanner, close the scanner's Document Feed Tray or disconnect the USB cable.

NOTE

- The scanner is set to turn off automatically if it is not used for scanning or for other purposes for 4 hours. (The Start button blinks.)
- The scanner turns on when the document is loaded in the document feed tray or when the scanner's Start button is pressed. (The Start button lights.)

Rating label of the power supply

A rating label with an illustration can be found at the back of the scanner.

The === symbol stands for DC (Direct Current) power supply.

Regulations

FCC REGULATIONS (For North America)

Document Scanner, Model M111162

This device complies with Part 15 of FCC Rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of this device.

Le présent appareil est conforme aux la partie 15 des règles de la FCC et CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment OFF and ON, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- Use of shielded cable is required to comply with Class B limits in Subpart B of Part 15 of FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Chapter 2 Important Safety Instructions

To ensure the safe operation of this scanner, be sure to read the safety warnings and precautions described below.

| Installation Location | 11 |
|--------------------------------------|----|
| Moving the Scanner | 12 |
| Handling | 12 |
| Disposal | 13 |
| When sending the scanner for repairs | 13 |

Installation Location

The performance of this scanner is affected by the environment in which it is installed. Make sure that the location where the scanner is installed meets the following environmental requirements.

 Provide adequate space around the scanner for operation, maintenance, and ventilation.

- Scanned documents are ejected behind the scanner. Be sure to provide sufficient space behind the scanner.
- Avoid installing the machine in direct sunlight.
- Avoid locations where a considerable amount of dust accumulates.
- Avoid warm or humid locations, such as in the vicinity of a water faucet, water heater, or humidifier. Avoid locations where ammonia gas is emitted. Avoid locations near volatile or flammable materials, such as alcohol or paint thinner.
- Avoid locations that are subject to vibration.
- Avoid exposing the scanner to rapid changes in temperature. If the room in which the scanner is installed is cold but rapidly heated, water droplets (condensation) may form inside the scanner. This may result in a noticeable degradation in scanning quality. The following conditions are recommended for optimal scanning quality: Room temperature: 10°C to 32.5°C (50°F to 90.5°F) Humidity: 25% to 80% RH
- Avoid installing the scanner near equipment that generates a magnetic field (e.g. speakers, televisions, or radios.)

Moving the Scanner

- When moving the scanner, always hold it with both hands to avoid dropping it.
- Make sure to disconnect any USB cables and when moving the scanner. If the scanner is carried with these items connected, the plugs and connectors may be damaged or cause the scanner to fall and result in personal injury or damage to the scanner.

Handling

Note the following precautions whenever using the scanner. Failure to do so may result in a fire or electric shock.

- Never place alcohol, benzene, paint thinner, or other flammable substances near the scanner.
- Do not allow water or flammable substances (alcohol, benzene, paint thinner, etc.) to spill inside the scanner, as this may result in a fire or electric shock.
- Do not cut, damage, or modify the USB cable. Do not place heavy objects on the cable, and do not pull or excessively bend the cable.
- Never connect the USB cable when your hands are wet.
- Do not knot or coil the USB cable, as this may result in a fire or electric shock.
- Use only the USB cable supplied with the scanner.
- Do not attempt to dismantle the scanner or modify it in any way, as this is dangerous and may result in a fire or electric shock.
- Do not use flammable aerosol spray products near the scanner.
- When cleaning the scanner, turn the scanner OFF and disconnect the USB cable.
- When disconnecting the USB cable, grasp it firmly by its connector. Do not pull directly on the USB cable, as this may damage or expose the cable's internal wiring, resulting in a fire or electric shock.
- Clean the scanner using a slightly dampened cloth that has been well wrung out. Never use alcohol, benzene, paint thinner, or any other flammable substance.
- If the scanner makes strange noises, or gives off smoke, heat, or strange odors, or the scanner does not function or other abnormalities occur when you use the scanner, immediately close the feed tray, turn the scanner OFF, and disconnect the USB cable. Then, contact your local authorized Canon dealer or service representative for further information.

- Do not drop the scanner, or subject it to impact or strong shock. Should the scanner ever become damaged, immediately close the feed tray, turn the scanner OFF, and disconnect the USB cable. Then, contact your local authorized Canon dealer or service representative for further information.
- Before moving the scanner, make sure to close the feed tray, turn the scanner OFF, and disconnect the USB cable.

- Do not install the scanner on a surface that is unstable, tilted, or subject to excessive vibrations. Doing so may cause the scanner to fall, resulting in personal injury or damage to the scanner.
- Never place small objects, such as staples, paper clips, or jewelry on the scanner. These items may fall into the scanner and cause a fire or electric shock. If such objects ever fall inside the scanner, immediately close the feed tray, turn the scanner OFF, and disconnect the USB cable. Then, contact your local authorized Canon dealer or service representative to have the unit serviced.
- Do not locate the scanner in a humid or dusty location. Doing so may result in a fire or electric shock.
- Do not place objects on top of the scanner. Such objects may tip or fall over, resulting in personal injury.
- Leave sufficient space around the USB cable so that it can be disconnected easily. If objects are placed around the USB cable, you will be unable to disconnect it in an emergency.
- If you will not be using the scanner for an extended period of time, such as during consecutive holidays, disconnect the USB cable for safety.
- Do not wear loose clothing or jewelry that may get caught in the scanner while you are using it. This may result in personal injury. Be extra careful of neckties and long hair. If anything becomes caught in the scanner, immediately disconnect the power to stop the scanner.
- Be careful when placing paper in the scanner and when removing jammed paper. It is possible to cut your hand on the edge of a sheet of paper.

Disposal

When disposing of this scanner, be sure to follow all local ordinances and laws or consult with the retailer who sold you the scanner.

When sending the scanner for repairs

When a request is made for repairs, the scanner needs to be sent to the specified address. When sending the scanner, use the packing box in which it came. Firmly secure the scanner with packaging material when you place it in the packing box.

Chapter 3 Installing the Software

This section describes the software installation procedure using the setup disk (DVD) that comes with this product.

| System requirements | 14 |
|-----------------------|----|
| Setup Disc Contents | 15 |
| Software Installation | |

System requirements

The following system requirements are recommended for optimal use of this scanner.

- Computer
 - CPU: Intel Core 2 Duo 1.66 GHz or faster
 - Memory: 1 GB or more
 - Hard disk: 3 GB or more available space required for installation
 of all software
 - USB interface: Hi-Speed USB 2.0
 - Monitor: Resolution of 1024 x 768 (XGA) or better recommended.
 - Optical drive: Drive capable of reading DVDs.
- Operating system
 - Microsoft Windows XP Service Pack 3 or later
 - Microsoft Windows XP x64 Edition Service Pack 2 or later
 - Microsoft Windows Vista Service Pack 2 or later (32-bit and 64bit editions)
 - Microsoft Windows 7 Service Pack 1 or later (32-bit and 64-bit editions)
 - Microsoft Windows 8 (32-bit and 64-bit editions)
 - Microsoft Windows 8.1 (32-bit and 64-bit editions)
 - OS X 10.7.5, 10.8.5, 10.9.1
- Other requirement
 - An ISIS-compatible application Windows or a TWAINcompatible application that is compatible with the above operating systems.
 - .NET Framework 4.0 of later Windows
- Scanning speeds are lower if your computer's standard USB interface is USB Full-Speed (equal to USB 1.1.)
- The USB cable you are using should be the one originally included with the scanner.
- If the CPU, memory, interface card, and other specifications do not satisfy the installation requirements, the scanning speed may be greatly reduced and transmission may take a long time.
- Even if the computer satisfies the system requirements, the scanning speed may vary, depending on the specification of the computer and the environment.

The scanner drivers provided with the scanner do not necessarily operate on all ISIS <u>Windows</u> or TWAIN-compatible applications. For details, contact your application software retailer.

Windows (

Precautions for Use in 64-bit Operating Systems

- The scanner driver supplied with this product supports scanning with 32bit applications only.
- Even with 32-bit applications, not all ISIS/TWAIN compliant applications are guaranteed to operate.
- Scanning speed may vary depending on the specifications of your computer.

Setup Disc Contents

Install the following software necessary for using the scanner from the supplied Setup Disc.

CaptureOnTouch

This is a dedicated scanning utility for this product.

• Scanner Driver This is the scanner driver for this product.

Third-Party Software

The following software applications are also included on the supplied Setup Disc (DVD-ROM). For details on installing these applications, refer to the Readme.txt file.

Presto! BizCard

Business card management software from NewSoft Technology Corp.

* Presto! BizCard is a registered trademark of NewSoft Technology Corp.

• Evernote

Multi-platform document filing software from Evernote Corp.

* Files required for installing this software must be downloaded via the Internet. For details, see Software Installation.

* For more information on this software, visit the following URL: http://www.evernote.com/about/intl/en/

When scanning with third-party software, user the scanner driver of this scanner to configure scanning conditions. For details on how to open the scanner driver, refer to the manuals supplied with each software application.

Cloud Service Software

For some of the supplied third-party software, a cloud service account is required to use some or all of their functions.

| Software | Cloud service used |

Connecting the Scanner to the Computer

Connect the scanner to the computer.

Connecting the Scanner to the Computer

Turn OFF the Auto Start switch on the rear of the scanner, and use the supplied USB cable to connect the scanner to the computer.

- Take care not to disconnect the USB cable while data is being transferred between the scanner and computer during scanning.
- The USB connector to which the scanner is connected on your computer must be one capable of supplying 500 mA / 5 V of power.
- Do not connect the scanner to the computer before installing the software.

Using a USB Hub

The scanner cannot be used when it is connected to a computer via a buspowered USB hub. A self-powered USB hub can be used, but operation is not guaranteed.

Auto Start Switch

There is an Auto Start switch at the rear of the scanner for setting whether to operate the scanner as a storage device.

Depending on the position of the Auto Start switch, the scanner operates as shown below.

| Switch Position | Scanner Operation | |
|--------------------|--|--|
| ON | The scanner is recognized as a storage device by the computer. Starting CaptureOnTouch Lite preinstalled in the scanner enables you to perform scanning on a computer without the scanner driver installed. (However, you cannot store scanned images or any other data on the scanner.) | |
| OFF | The scanner is recognized as a scanning device by the computer. You can connect the scanner to a computer with the scanner driver installed, and perform scanning using an application, such as the supplied CaptureOnTouch. | |

- Turn the Auto Start switch ON or OFF before you connect the scanner to a computer. If it is turned ON or OFF after the scanner is connected to a computer, the scanner may not operate properly.
- When you use the scanner with the Auto Start switch turned ON, the computer needs to be started before you connect the scanner to the computer. If the scanner is connected to a computer that is not started and the feed tray of the scanner has been opened to turn ON the power, the computer may not be able to start.

Turning the Power ON

1 Open the document feed tray to turn on the scanner's power supply.

 When connecting a USB cable and opening the document feed tray, the start button can slowly flash. After the start button stops flashing and remains lit, the scanner is ready for use.

Opening the scanner document feed tray switches on the power supply automatically.

The scanner turns ON, and the Start button lights.

Windows (

When the scanner is turned on for the first time, the balloon message shown below appears on the Windows task bar. If you wait a while, automatic scanner recognition will end and the scanner will become ready to use.

Chapter 5 Placing Documents

This section describes how to load a document for scanning.

| Documents | 23 |
|--------------------|----|
| Loading a document | 25 |
| Loading cards | 27 |

Documents

The scanner can scan documents ranging in size from business cards and checks to LTR/A4/LGL. The document sizes that this scanner can scan are shown below.

Plain Paper

| Size | Width: 50.8 mm to 216 mm (2" to 8.5") Length: 70 mm to 356mm (2.756" to 14") |
|-----------------|---|
| Paper weight | 52 to 209 g/m ² (0.06 mm to 0.22 mm (0.0024" to 0.0087")) |

A document must meet the following criteria to be scannable:

When scanning multiple documents of different sizes, place the documents so that they cover the entire span of the feed rollers.

- Scanning documents before the ink is dry can cause problems with the scanner. Always make sure that the ink on a document is dry before scanning it.
- Scanning documents that are written in pencil or similar material may make the rollers and scanning glass dirty, which can lead to smudges on the scanned image and transfer the dirt to subsequent documents. Always clean the internal parts of the scanner after scanning such documents.
- When scanning a two-sided document that is printed on thin • paper, the image on the opposite side of each page may show through. In this case, adjust the scanning intensity in the application software before scanning the document.
- It is recommended that thin documents are fed one sheet at a time.

Scanning the following types of documents can cause a paper jam or malfunction. To scan such a document, make a photocopy of the document and then scan the photocopy.

Curled documents

Coated paper

Torn documents

Extremely thin, translucent

Documents with paper clips or staples

Documents with excessive paper dust particles.

Postcard

88.9 to 108 mm (3.5" to 4.25") x 127 to 152.4 mm (5" to 6") 128 to 300g/m² (0.15 to 0.4 mm (0.0059" to 0.0157"))

Business Card

| Size | 49 to 55 mm (1.93" to 2.17") x 85 to 91 mm (3.35" to 3.58") |
|-----------------|--|
| Paper weight | 128 to 380g/m ² (0.15 to 0.45 mm (0.0059" to 0.0177")) |

Card

| Size | 86 mm (3.39") x 54 mm (2.13") (ISO/IEC standard) |
|--------------------------|--|
| Card thickness | 0.76 mm (0.03") or less |
| Orientation | Vertical feeding only |
| For embossed cards | Up to 1.4 mm (0.055") |

CAUTION

- If you place cards to be fed horizontally, they may not be ejected properly, and cards that get jammed may be damaged when you remove them. Take care of the orientation when placing cards.
- Embossed cards may not be able to be scanned correctly, depending on the type of embossment.

Loading a document

- 1 Open the feed tray to turn ON the scanner.
- 2 As shown in the figure, with the document feed tray opened, pull the tray toward you.

As shown in the figure, pull the center part of the document feed tray (see enlarged image) all the way out toward you.

- 3 Load the document.
 - Before you load the document, thoroughly fan the pages.

- Straighten out the creases and folds at the ends of the manuscript.
- If the document is curved, straighten the document before loading it.
- Load the document into the feed inlet of the scanner with the scanning side of the document face down and the top of the document pointing down.

4 Align the document guides with both edges of the loaded document.

- Press the document beneath the tabs of the document guides.
- Up to 10 pages of plain paper can be loaded at the same time. Make sure that the document does not exceed the loading limit

marks (\mathbf{Y}) on the document guides.

When the document is inserted all the way in, the paper pressure holds the document in place automatically.

Be sure to load the paper straight in.

(If the document is slanted when loading to the back of the paper pressure, it will not be fed correctly.)

A scanned document is ejected behind the scanner. Do not place any objects behind the scanner.

- If double-feeding occurs, reduce the number of pages that you load into the scanner at one time.
- When scanning small size of multiple documents such as receipt, use documents which have the same width.
- Depending on paper quality, you may hear unusual noises while scanning some documents, but this does not indicate a malfunction.
- 5 When the scan is finished, set the document feed tray back to its original position.

- Set the document feed tray from the pulled out position back to its original position.
- Push in (push back) the document feed tray in the direction of the arrow.

6 Close the feed tray.

Loading cards

When scanning plastic cards, scan cards one at a time using the following procedure.

- 1 Open the document feed tray.
- 2 As shown in the figure, with the document feed tray opened, pull the tray toward you.

As shown in the figure, pull the center part of the document feed tray (see enlarged image) all the way out toward you.

- **3** Vertically insert the card directly into the feed inlet, and with the back facing up.
- 4 Adjust the document guide so that it makes contact with both edges of the card.

The card will be fed when you start scanning.

- If you are scanning an embossed card, load the card with the embossed side facing up.
- Embossed cards may not be scanned correctly, depending on the type of embossment.
- After a card is scanned, it is ejected from the back of the scanner. Do not place objects behind the scanner.
- 5 When the scan is finished, set the document feed tray back to its original position.

- Set the document feed tray from the pulled out position back to its original position.
- Push in (push back) the document feed tray in the direction of the arrow.

6 Close the feed tray.

Click the Select document and Output panels, and then click the [Scan] button to scan the document. You can select the scan method according to the document type and purpose of use before scanning.

Scanning Procedure

1 Set the Auto Start switch at the rear panel of the scanner to ON and then connect the scanner to the computer.

2 Open the feed tray, turn ON the scanner, and then load the document.

Windows (

For details, "Loading a document".

When you open the feed tray, the Start button on the scanner lights and the auto play screen appears.

If you are using Windows XP and you set the Auto Start switch to ON before connecting the scanner to the computer, a message requesting that you restart your computer may appear when you turn ON the scanner. You can continue normal use even if you click [No] and do not restart the computer.

1 Click [Open folder to view files].

CaptureOnTouch Lite starts, and the main screen appears.

IMPORTANT

Do not close the feed tray before the main screen of CaptureOnTouch Lite appears.

- The [AutoPlay] screen may not appear in some operating environments. In such cases, open the [ONTOUCHLITE] drive in Windows Explorer, for example, and start the application directly by double-clicking [ONTOUCHL.exe]. Depending on your operating system, the drive name may not be [ONTOUCHLITE]. Open the drive on which [ONTOUCHL.exe] is located, and start the application directly.
- Depending on your operating system, [CaptureOnTouch Lite] may appear in the [AutoPlay] screen. In such cases, double-click [CaptureOnTouch Lite] to start CaptureOnTouch Lite.

What is CaptureOnTouch?

CaptureOnTouch is a scanning application that enables you to scan a document with a simple operation merely by selecting the screen panel.

CaptureOnTouch is provided with multiple scanning methods that can be selected according to the purpose and application.

Turn OFF the Auto Start switch on the rear of the scanner, and use the supplied USB cable to connect the scanner to the computer. For details, see Connecting the Scanner to the Computer20.

CaptureOnTouch supports the following scanning methods.

Standard Scanning

Click the Select document and Output panels, and then click the [Scan] button to scan the document. You can select the scan method according to the document type and purpose of use before scanning.

-> "Standard Scanning"

Scanning Shortcut

You can register in advance combinations of frequently-used document selections and output methods as a "Scanning Shortcut". Just click the Scanning shortcut panel to implement the scan.

-> "Scanning Shortcut"

Various panels have been prepared according to the scan types and outputs in each section.

Click the [New document] button, and a [New document] panel will be added.

Standard Scanning

Operations;

Selecting the Select document panel-> Selecting the Select output panel->Start scanning

- 1 Place the document in the scanner.
- 2 Click the select document panel for the document to be scanned from [1 Select document].

The selected [Select document] panel will be displayed in orange. To edit scan images, see "Select document settings".

3 Click the output panel for the scan image application from [2 Output]. The selected [Output] panel will be displayed in orange. To edit the [Output] panel, see "Setting the output".

4 Click the [SCAN] button.

The document is scanned. While scanning is in progress, the number of pages scanned is displayed in addition to the scanner settings.

When the scan is finished, the [Scanned image preview screen] opens.

If using the same document selection and output combination the next time, click the [Save to Shortcut] button.

The selected [Output] and [Select document] will be added to the [Scanning shortcut] panel.

- If you configure scanning conditions that consume a large amount of the computer's memory, scanning may stop because of insufficient memory. If an error message appears due to insufficient memory while scanning is in progress, stop scanning, change the scanning conditions, and then try scanning again.
- A multiple-page scan cannot be saved when it reaches the file size of 2 GB. Change the save settings if an error message is displayed.

If scanning continuously, set the next document, and click the [Scan more pages] button to start the document scan.

5 To check the scanned image, click the [Finish] button.

To edit scan images, see Operations for the scanned image edit window52.

Click the [\checkmark] button to edit the output settings. -> "Setting the output" Click the [Cancel] button to discard the scanned image and return to the main window.

When the output has finished, a popup window will be displayed. If saving the scanned image, a link to open the save destination folder will be displayed.

This completes the Standard Scanning.

If you click [Open storage folder], the folder in which the saved scanned images were saved opens. Depending on the output settings, the [Open storage folder] button may not be displayed.

Scanning Shortcut

Operations;

Save [Scanning Shortcut] -> Scan the document -> Output the scanned images

By adding scanning shortcuts that combine frequently-used document selections and outputs, you can scan just by clicking the Scanning Shortcut panel.

If a registered scanning shortcut is allocated to the start button, you can implement shortcut scans using these settings just by pressing the scanner start button -> "Scanning with Start Button"

Registering and editing scanning shortcuts

Multiple scanning shortcuts can be allocated to CaptureOnTouch.

1 Either click the [New shortcut] button in [Scanning shortcut], or select the document scan and output in [Standard Scanning], and click the [Save to Shortcut] button.

A scanning shortcut panel will be created.

You can also create a new Destination panel by clicking [1] on the [New] button, and in the menu that appears, selecting the type of Scanning Shortcut.

2 The Edit Scanning Shortcut Panel dialog box appears when you click the Edit button.

3 Click the [Document] tab to set the Select document settings. -> "Select document settings"

If [Edit after scanning] is disabled in the scanning shortcut settings, the edit window will not be displayed.

Click the [\checkmark] button to edit the output settings. -> "Setting the output" Click the [Cancel] button to discard the scanned image and return to the main window.

When the output has finished, a popup window will be displayed. This completes the shortcut scans.

If you click [Open storage folder], the folder in which the saved scanned images were saved opens. Depending on the output settings, the [Open storage folder] button may not be displayed.

Scanning with Start Button

Scanning shortcuts" are allocated to the scanner start button in advance.

You can set frequently-used scans to the scanning shortcuts, and then allocate them to the start button.

If you place the document and press the Start button, CaptureOnTouch starts and scanning starts.

- If the [Do not display the main screen when the scan is started with the scanner button] checkbox is enabled in the Environmental settings, the main CaptureOnTouch window will not be displayed when a scan is started from the start button. Only dialog boxes, error messages, and completion popup windows are displayed during scanning.
- If the [Do not display the main screen when the scan is started with the scanner button] checkbox is enabled in the Environmental settings, [Enable additional scan] and [Edit after scanning] will be disabled when scanning is started from the start button.

Operations for the scanned image edit window

When scanning has finished, a preview window of the scanned image will be displayed.

To display the edit window in the preview window, click \blacksquare on the tool bar.

[Straightens with angle contents of fed documents]

[Rotate image to match orientation of text]

Check [Enable] on to rotate the image in the same direction with the characters.

[Use advanced settings dialog box]

Document scan settings include basic items that are configured in [Scan settings], and the settings that are configured in the advanced settings dialog box. The settings in the advanced settings dialog box are applied for settings other than the basic items.

Enable [Use advanced settings dialog box] to implement advanced scanner settings other than the basic items using the advanced settings dialog box (scanner driver). To open the scanner driver, enable this item, and then click the [Settings] button.

The driver settings dialog box includes setting items that are the same as the basic items in [Scanner setting], but the setting for each of the them is stored separately.

Which settings are used during scanning differs as follows depending on the setting of the [Use advanced settings dialog box] check box.

| Setting of [Use advanced settings dialog box] | Basic items | Other than basic items |
|---|--|---|
| OFF | Settings of [Scanner setting] | Settings of the advanced settings dialog box of the scanner driver |
| ON | Settings of the advantage of the scanner d | 0 0 |

CaptureOnTouch supplies output methods other than [Save to folder] as plugins.

By installing the plug-in, you can use various services such as printing the scanned image or attaching it in an e-mail.

To install plugins, enable the checkbox when installing CaptureOnTouch.

The output methods that can be selected depend on the plugins that have been installed.

For how to use the plugins, see the plugin help.

Scanning Shortcut setting

By default, CaptureOnTouch Lite enables the [Full auto] scan setting, so scanning is implemented using the scan conditions that match the document.

To specify combinations of document selection and outputs, you can edit the scanning shortcut panel to set the desired scanning shortcut.

Creating new [Scanning Shortcut] panels

There are two ways as described below to create a new Scanning Shortcut panel.

- Click the [Save to Shortcut] button in [3 actions] in Standard Scanning to register the selected output and document scan to one of the scanning shortcut panels.
- Click the [New shortcut] button to add [New scanning shortcut] panel.

Click To display the list of panel types. The selected type of the panel is created.

Editing new [Scanning Shortcut]] panels

When the Edit button \checkmark is clicked, the Scanning Shortcut panel editing dialog will appear.

The following tabs are on the Edit Scanning Shortcut panel screen.

Configure basic scanning conditions such as the mode, page size, resolution, and scanning side.

In addition, you can click the [Area] button and specify the area to be scanned.

Depending on the ISIS compatible application, the application may have its own screen for setting scanning conditions. If the scanner driver is opened in such an application, setting items related to the functions provided by the scanner driver other than scanning conditions will be displayed on the [Basic] tab.

[Brightness] Tab

Adjust the brightness and contrast of scanned images.

In addition, you can also click [Gamma] and set the gamma correction value for scanned images.

- Gamma correction is set when the color tone of the scanned image is different from that of the image displayed on the monitor.
- For information on your monitor's gamma value, see the instruction manual that came with the monitor.

Configuration and Functions of the Scanner Driver

Scan Panel

Scan Panel

Scan Panel is software for controlling scanning operations such as feeding documents and stopping scanning when scanning multiple documents one after the other.

Windows (

Scan Panel runs when [Feeding Option] is set to [Panel-Feeding] or [Automatic Feeding] in the settings dialog box of the scanner driver. In this case, the Scan Panel appears when you are not scanning and the scanner enters the wait state.

| Scan P | anel | |
|--------|-------|--|
| | STOP | |
| | START | |

If you place the next document and then click the Start button in Scan Panel, scanning of the placed document starts.

You can stop scanning part way through by clicking the [STOP] button of Scan Panel.

If you click [More] in the settings screen of the scanner driver and then set [Feeding Option] to [Panel-Feeding] or [Automatic Feeding] in the dialog box which appears, Scan Panel appears when the scanner starts.

| Scan | ning |
|------|-------------------|
| | |
| | Continue scanning |
| | |

When scanning of the first document finishes, Scan Panel appears and the scanner enters the wait state. If you place the next document and then click [Continue scanning], scanning of the placed document starts.

You can stop scanning part way through by clicking [Finish].

Setting Basic Scanning Conditions

This section provides an overview of the basic setting items that are the minimum requirements when configuring the scanner settings.

|--------------------------------|--|
| Detect automatically | |
| Black and White | |
| Advanced Text Enhancement II | |
| 256-level Gray 24-bit Color | |
| 24-DR LOIOR | |

- [Advanced Text Enhancement II] remove or process the background color and background surrounding text to enhance the text for easy reading. When [Advanced Text Enhancement II] is selected, you can make the text in scanned images easier to read by adjusting the contrast on the [Brightness] tab.
- [Detect automatically] detects whether the document is in color, grayscale, or black and white. You can configure advanced settings related to the detection method by clicking [Setting]. For details, see the Help.

Page Size

Select the page size that matches the document to be scanned.

| LETTER |
|---------------------|
| Match original size |

|----------------------|---|
| Detect automatically | |
| 150 dpi | |
| 300 dpi | |
| 400 dpi | |
| 600 dpi | _ |

Higher resolutions provide clearer images but result in larger file sizes and slower scanning.

When [Detect automatically] is specified, the resolution is detected automatically from the content printed in the document.

Scanning Side

Select which of the sides of the document to scan.

Simplex Skip blank page Simplex Duplex

If the scanning side is set to [Skip blank page], the images of blank pages are deleted when images are saved.

Confirming Basic Conditions for Scanning

When you scan a document, make sure you confirm the [Color mode], [Dots per inch], [Page Size], and [Scanning Side] basic conditions in the settings screen of the scanner driver.

[Advanced Text Enhancement II] is suitable for scanning a document with a uniform background color and light text and background. If the background is non-uniform, such as a pattern, the background may not be able to be completely removed and the text may become difficult to read. If necessary, you can make the text in scanned images easier to read by adjusting the contrast on the [Brightness] tab.

Select [Advanced Text Enhancement II] in the [Color mode] setting. The background behind the text is removed or processed so that the text is emphasized for better readability.

Chapter 10 Regular Maintenance

Clean the scanner and perform maintenance on a regular basis as described below to maintain peak scanning quality.

| Cleaning the Scanner |
|----------------------|
|----------------------|

- When cleaning the scanner and the inside of the scanner, turn the power OFF and disconnect the power cord from the power outlet.
- Do not use spray cleaners to clean the scanner. Precision mechanisms, such as the light source, may get wet, and cause a malfunction.
- Never use paint thinner, alcohol, or other organic solvents to clean the scanner. Such solvents can damage or discolor the exterior of the scanner, or create a risk of fire or electrical shock.

Cleaning the Scanner

To clean the exterior of the scanner, dampen a cloth with water or a mild detergent, wring the cloth out thoroughly, and then wipe the dirt away. Then use a dry, soft cloth to wipe away any moisture.

Do not use a coarse cloth or dirty cloth because it may result in scratches.

Cleaning the Inside of the Scanner

Dust or paper particles inside the scanner may cause lines or smudges to appear on scanned images. Use compressed air to periodically clean dust and paper particles from the document feed opening and the inside of the scanner. After finishing a large scanning job, turn OFF the scanner and then clean out any paper particles remaining inside the scanner.

Cleaning the Scanning Glass and the Rollers

If scanned images contain streaks, or if the scanned documents become dirty, the scanning glass or rollers inside the scanner may be dirty. Clean them periodically.

1 Open the feed tray.

2 Open the feeder cover.

3 Use compressed air to remove dust and paper particles from the inside of the scanner.

4 Remove any dirt from the scanning glass, separation pad and rollers inside the scanner (parts shown in the figure).

Use a clean dry cloth to wipe off any dirt on the scanning glass. Wipe off any dirt on the rollers with a cloth that has been dampened with water, and then wipe the rollers with a clean soft dry cloth. Without needlessly rotating the roller, clean the exposed area.

Do not spray water or neutral detergent directly on the scanner. Precision mechanisms, such as the light source, may get wet, and cause a malfunction.

Scratches on the sensor glass may cause marks on the images, as well as feeding errors. If there are scratches on the sensor glass, contact your local authorized Canon dealer or service representative.

Chapter 11 Detaching and attaching the separation pad

When replacing the separation pad, perform the following steps to detach it from and attach it to the unit.

| Detaching and attaching the separation pad | 90 |
|--|----|
|--|----|

When to replace the separation pad

The separation pad inside the scanner is a consumable item and wears with scanner use. A worn separation pad is no longer able to correctly feed a document and can cause paper jams.

If documents no longer feed correctly as frequent multi feed, replace the separation pad.

Contact your local authorized Canon dealer or service representative for detailed information about the replacement parts.

Detaching and attaching the separation pad

When replacing the separation pad, perform the following steps to detach it from and attach it to the unit.

Detaching the separation pad

1 Open document feed tray and the feeder cover.

2 Push up the paper pressure until it makes a click sound.

3 With the paper pressure in a raised position, detach the separation pad.

Attaching the separation pad

1 Attach the separation pad.

2 Close the feeder cover.

Attach the separation pad securely until it clicks into place. If the pad is not attached completely, feeding errors may occur.

Chapter 12 Uninstalling the Software

If the scan driver, CaptureOnTouch is not operating normally, follow the procedure below to uninstall them. Then, re-install the software from the Setup disc. -> "Software Installation" on p.16

Chapter 13 Troubleshooting

| Clearing a Paper Jam | 92 |
|-------------------------------|----|
| Common Problems and Solutions | 94 |
| Software Troubleshooting | 96 |
| Useful tips | 96 |

Clearing a Paper Jam

When paper jams occur during scanning, use the following procedure to clear them.

Be careful when removing jammed paper. It is possible to cut your hand on the edge of a sheet of paper.

1 Remove any documents remaining in the feed tray.

2 Open the feeder cover.

3 Remove the jammed document from the feed side or eject side.

Carefully pull out the document without using excessive force. If the jammed paper tears, make sure that you remove any remaining pieces. Make sure the document does not get caught in the card guides as well.

4 Close the feeder cover.

After you remove the jammed paper, check to see if the last page was scanned correctly, and then continue scanning.

When a paper jam or other problem occurs while [Rapid recovery system] is enabled in the scanner driver, the image of the last document that was scanned properly is saved before scanning is stopped. Therefore, you can quickly resume scanning after resolving the cause of the interruption. As the image of the document that was being fed at the time of the interruption may not be saved in such cases, be sure to verify the last scanned image before resuming the operation.

Common Problems and Solutions

This section provides recommended solutions to common problems.

If you have a problem that is not solved by the following, contact your local authorized Canon dealer.

Q1 The scanner does not turn ON.

- A1 1 The scanner remains OFF while the feed tray is closed. When you open the feed tray, the scanner turns ON automatically.
 - 2 If the scanner is connected to the computer via a USB hub, try removing the hub and connecting directly to the computer.

Q2 The scanner is not recognized.

- A2 1 Confirm that the scanner is properly connected to the computer with a USB cable.
 - 2 Confirm that the scanner is turned on. See the previous "Q1" "The scanner does not turn ON.". if the scanner does not turn on.
 - 3 The computer's USB interface may not support the scanner. The scanner cannot be guaranteed to work with all USB interfaces.
 - 4 Confirm that the supplied USB cable is used to connect the scanner to the computer. The scanner cannot be guaranteed to work with all available USB cables.
 - 5 If the scanner is connected to the computer via a USB hub, try removing the hub and connecting directly to the computer.
 - 6 When the Auto Start switch on the scanner is set to ON, you can only scan with the built-in application, CaptureOnTouch Lite. In this case, scanning from applications on the computer is disabled.
 - 7 When the scanner is operated with Windows and if "?", "!", or "x" icons appear for the scanner in Device Manager, delete the scanner in Device Manager and reinstall the scanner driver.

Q3 Documents feed askew (scanned images are slanted).

- A3 1 Reduce the number of pages that you load into the scanner at one time, and then scan again.
 - 2 Align the document guides to fit the documents as closely as possible, and load the documents so that they feed straightly.
 - 3 Enable [Automatically straightens skewed] (or [Deskew]) in the scanner driver settings.
 - 4 If many pages have been scanned since the last roller cleaning, clean the rollers and separation pad. When cleaning the scanner refer to "Cleaning the Scanning Glass and the Rollers" on p.88. When replacing, refer to "When to replace the separation pad" on p.89.
 - 5 Confirm that the separation pad is attached securely.
 - 6 Perfectly straight scanning may not be possible for the document due to the structural design of the scanner.

Q4 CaptureOnTouch Lite does not start.

- A4 1 If the Auto Start switch on the scanner is set to OFF, the builtin application, CaptureOnTouch Lite, does not start. Close the feed tray to turn OFF the scanner, and set the Auto Start switch to ON.
 - 2 If access to USB devices is blocked by security software, you may not be able to use CaptureOnTouch Lite.

Q5 The auto play screen appears when the scanner is connected, but you cannot scan with CaptureOnTouch.

A5 When the Auto Start switch on the scanner is set to ON, you can only scan with the built-in application, CaptureOnTouch Lite. Close the feed tray to turn OFF the scanner, and set the Auto Start switch to OFF.

Q6 Documents are not scanned according to the settings configured in the scanner driver.

A6 When you scan using [Select document] panel registered with CaptureOnTouch, the CaptureOnTouch settings have priority over the scanner driver settings. Edit settings in the [Select document] panel, or create a new [Select document] panel using the desired scanning conditions.

Q7 If white lines or streaks appear in scanned images.

A7 Clean both sides of the scanner glass, and the rollers. If a sticky substance such as glue or correction fluid is found, carefully wipe with just enough pressure to clean the area where the lines appear. For cleaning the scanner, refer to "Chapter 10 Regular Maintenance". If the problem cannot be solved by cleaning, the internal glass may be scratched. Contact your local authorized Canon dealer.

Q8 Pages are missing.

A8 Then the scanner driver's [Scanning Side] setting is [Skip blank page], documents with very little black may be unintentionally skipped. Decrease the [Set the likelihood of skipping blank page] value "When you want to delete the images of the blank pages in two-sided documents" on p.75, or select another scan mode setting such as [Simplex] or [Duplex]. If pages are skipped due to the document double feeding, see "Q9" "Documents jam (or double-feed).".

Q9 Documents jam (or double-feed).

- A9 1 If the feed roller and the separation pad have been installed correctly, clean them if necessary. For cleaning and replacement, refer to "Chapter 11 Detaching and attaching the separation pad".
 - 2 Proper scanning may not be possible when document pages stick together due to static electricity. Fan the documents before you load them.

Q10 Multiple pages of scanned images cannot be saved to a single file.

- A10 Depending on the file format, multiple scanned image pages cannot be saved as a single file with CaptureOnTouch Lite and CaptureOnTouch.
 - BMP, PNG, JPEG: Always save one page per file.
 - PPTX: Always saved multiple pages per file.
 - TIFF, PDF: You can save multiple pages to a single file by clicking and selecting in the displayed dialog box.
 - For the setting method, see "About file formats".

Q11 All of the placed documents have been scanned, but the scanned image does not appear on the application.

A11 When [Panel-Feeding] or [Automatic Feeding] is selected as the document feeding method on the scanner driver's setting screen, scanning will continue even after all documents have been scanned because the scanner is waiting for additional documents. To finish the operation and send the scanned images to the application, press the [STOP] button (Windows) / [Finish] button (OS X) on the operating panel.

Q12 Memory becomes insufficient and scanning stops.

- A12 If you configure scanning conditions that use a large amount of the computer's memory, scanning may stop because of insufficient memory. Although this depends on the computer's memory size, the possibility of insufficient memory increases if any of the following scanning conditions overlap.
 - [Color Mode] is set to [24-bit Color]
 - A large page size (e.g. Legal) is specified as the [Page Size]. Alternatively, the page size is set to [Scanner's Maximum].
 - A high resolution (600dpi etc.) is specified for [Dots per inch]. If an error message appears due to insufficient memory while scanning is in progress, stop scanning, change the scanning conditions (e.g. reduce the resolution or page size) and then try scanning again. In addition, the amount of memory used can be contained by turning off [Moire Reduction] and [Prevent Bleed Through/Remove Background] if they are set to on.

Q13 The scanner makes unusual noise while feeding documents.

A13 The paper quality of some documents can result in unusual noises, but this does not indicate a malfunction.

Software Troubleshooting

This section describes troubleshooting problems and solutions for operating the supplied software (CaptureOnTouch).

If scanning is too slow

- 1 Close other running programs, if any.
- 2 Scanning can be slowed down by memory shortage caused by memory-resident applications such as anti-virus programs. Close such memory-resident programs if necessary to free up memory space.
- 3 When insufficient hard disk space is available, the scanner may be unable to create the necessary temporary files for scanned data. Delete unneeded data on the hard disk to free up more space.
- 4 Scanning is slow if the computer's USB port is not Hi-Speed USB 2.0 compliant.
- 5 If using a common USB cable that is not Hi-Speed USB 2.0 compliant, replace the cable with the supplied compliant cable.
- 6 When the scanner is connected to the computer via a USB hub that is not Hi-Speed USB 2.0 compliant, remove the hub and connect the scanner directly to the computer.

If scanned image files cannot be opened in an application

- 1 Scanned images saved as multi-page TIFF files can be opened only by programs that support this file format.
- 2 Images saved as compressed TIFF files (single- as well as multipage) can only be opened by programs that support the compressed format. This can occur with programs that are not compatible with CaptureOnTouch. In this case, select "None" as the image file compression format before scanning.

CaptureOnTouch plug-in or Captiva Cloud cannot be used Install .NET framework if it is not yet installed.

Useful tips

Here are some useful tips for scanning documents.

Where are scanned images saved? Can the save destination be changed?

Images are saved to the following locations, according to program settings. All destination locations can be changed to other folders.

CaptureOnTouch

Both Standard Scanning and Scanning Shortcut save the output to the destination set in the [Select output] panel.

How are the scan settings configured?

CaptureOnTouch

By clicking the Edit button ([) in the [Select document] panel, you can edit the scan settings when the [Select document edit screen] opens.

How do I save multiple pages in one file, or save one file per page?

When scanned images are saved in BMP, PNG, or JPEG format, each page is always saved as separate files.

When scanned images are saved in PPTX format, multiple pages are always saved in one file.

When scanned images are saved in PDF or TIFF format, you can specify multi- or single-page files. See also Q10 in "Common Problems and Solutions" on p.94

Can I copy or back up scanner setting configurations?

CaptureOnTouch

The setting configurations can be backed up and restored using [Back Up/Restore] on the [Basic settings] tab on the [Environmental settings] dialog box.

What rules apply to scanned image file names?

CaptureOnTouch

For both Standard Scanning and Scanning Shortcut, the file names of scanned images are set based on the settings in the [Select output] panel. This screen opens when you click the Edit button ([]) in the [Select document] panel.

Click the [Detail Settings] button on this screen. You can set the file names of scanned images by setting all or some of the three items shown below.

| Setting | Description |
|---------------------------|--|
| File name | Any specified text string to be included in the file name. |
| Add date and time | Appends the date and time to file names. Select the date format from the list box. YYYY = year, MM = month, and DD = day of month. The time is appended after the date. |
| Add counter to file names | Append serial numbers in the order of scanned image saving. Specify the number of digits and starting number. |

A sample file name is displayed as the [File name] in the [File name settings] dialog box.

How can I skip blank pages, and scan only non-blank pages?

Specify [Skip Blank Page] in the [Select document] panel or on the scanner driver setting screen, then scan.

How do I scan cards?

Set the card in the portrait orientation into the scanner. Specify the same size as the card (or [Match original size] (Windows) or [Autodetection](OS X)), then scan. For details, see "Loading cards" on p.27

How do I load and scan documents with mixed sizes?

Set [Page Size] to [Match original size] on the scanner driver settings screen, then scan. For details, see "To scan unregistered size documents" on p.73

What's the best way to scan business cards or photos?

Set [Page Size] to [Match original size] on the scanner driver settings screen, then scan. Alternatively, register the size of the cards or photos to be scanned. For details, see "To scan unregistered size documents" on p.73

If you want to scan a photograph but with document quality data, in the scan driver settings screen select "Correct for picture quality image" and then scan the image. For details, refer to "How to produce a picture quality scan" on p.78.

Scanned image edges are lost when scanning while setting [Page Size] to [Match original size] (Windows) or [Detect automatically] (OS X) in the settings screen of the scanner driver.

How can I scan correctly without any loss of edges?

Set the check box of [Trimming] in the [Image processing] tab to OFF (Windows)/Set the check box of the [Trimming] dialog box displayed when you click [More] to OFF (OS X) in the settings screen of the scanner driver. Alternatively, set [page size] to any settings other than [Match original size] (Windows) or [Detect automatically] (OS X) in the settings screen of the scanner driver.

Scanned image edges are lost when scanning document that is closer to black with dark borders. How can I scan correctly without any loss of edges?

Set the check box of [Remove Shadow] in the [Image processing] tab to OFF (Windows)/Set the check box of the [Remove Shadow] dialog box displayed when you click [Image processing] to OFF (OS X) in the settings screen of the scanner driver.

How do I print scanned data?

- CaptureOnTouch
 - For both Standard Scanning and Scanning Shortcut, select [Print] in the [Select output] panel.
 - To use this function, you need to install a plug-in.
 - The plug-in can be installed by selecting its checkbox when installing CaptureOnTouch.

I want to save to other folders

- CaptureOnTouch
 - In CaptureOnTouch, destinations other than [Save to folder] are provided as a plug-in.
 - By installing the plug-in, the scanned image can be printed, attached in an e-mail, or shared using various cloud services.
 - The plug-in can be installed by selecting its checkbox when installing CaptureOnTouch.
 - The available output destinations vary depending on the installed plug-in.

How can I attach scanned data to an e-mail (or send it as e-mail)?

- CaptureOnTouch
 - For both Standard Scanning and Scanning Shortcut, select [Attach to E-mail] in the [Select output] panel.
 - To use this function, you need to install a plug-in.
 - The plug-in can be installed by selecting its checkbox when installing CaptureOnTouch.

How do I use the automatic document color detection function?

The scanner driver for this scanner includes a function that automatically detects the color mode from the contents of a document.

The color modes that can be detected automatically by this function depend on the application and scanner driver settings you are using as follows.

| Condition | Modes that can be detected |
|--|--|
| When [Color mode] in [Select document panel editing dialog] of CaptureOnTouch is set to [Detect automatically] | [Color or Gray] |
| When [Full Automatic Mode] is selected for the scanner driver | |
| When [Color mode] for the scanner driver is set to [Detect automatically] and advanced settings for auto- detection are set | One of the following can be selected: • [Color or Gray] • [Color or Binary] • [Color, Gray or Binary] |
