#### SECTION 1 IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING

#### 1.1.Product Identifier

Product name	Lyreco Solvent Based Correction Fluid
Synonyms	Not Available
Proper shipping name	PAINT or PAINT RELATED MATERIAL
Other means of identification	Not Available
1.2.Relevant identified	uses of the substance or mixture and uses advised against
Relevant identified uses	Correction fluid for paper or fax copies.
Uses advised against	Not Applicable
1.3.Details of the supp	lier of the safety data sheet
Registered company name	LYRECO
Address	Rue du 19 mars 1962, 59770 Marly, France
Telephone	+33 (0) 3 27 23 64 00
Fax	Not Available
Website	Not Available
Email	msds@lyreco.com
Association / Organisation	Not Available
Emergency telephone numbers	+33 (0) 3 27 23 64 00
Other emergency telephone numbers	Not Available

#### **SECTION 2 HAZARDS IDENTIFICATION**

#### 2.1. Classification of the substance or mixture

Considered a dangerous mixture according to Directive 1999/45/EC, Reg. (EC) No 1272/2008 (if applicable) and their amendments. Classified as Dangerous Goods for transport purposes.

DSD classification	In case of mi 1272/2008 re	ixtures, classification has been prepared by following DPD (Directive 1999/45/EC) and CLP Regulation (EC) No egulations
DPD classification [1]	R51/53	Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
	R65	HARMFUL-May cause lung damage if swallowed.
	R22	Harmful if swallowed.
	R11	Highly flammable.

**CLP label elements** 

SIGNAL WORD

ORD DANGER

# Hazard statement(s)

mazaru statement(s)	
H225	Highly flammable liquid and vapour
H302	Harmful if swallowed
H315	May cause skin irritation
H411	Toxic to aquatic life with long lasting effects

# Supplementary statement(s)

Not Applicable

#### Precautionary statement(s) Prevention

P241	Keep out of reach of children.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P233	Keep container tightly closed.
P273	Avoid release into the environment.

#### Precautionary statement(s) Response

recodditionary stateme	in(a) response
P301+P310	IF SWALLOWED: Immediately call a POISON CENTER/doctor/physician/first aider
P302+P352	If on the skin wash with plenty of soap and water.
P331	Do NOT induce vomiting.
P370+P378	In case of fire: Use alcohol resistant foam or normal protein foam for extinction.
P301+P312	IF SWALLOWED: Call a POISON CENTER/doctor/physician/first aider/if you feel unwell.

# Precautionary statement(s) Storage

P403+P235	Store in a well-ventilated place. Keep cool.

#### Precautionary statement(s) Disposal

**P501** Dispose of contents/container in accordance with local regulations.

#### 2.3. Other hazards

 $REACh - Art.57-59: The \ mixture \ does \ not \ contain \ Substances \ of \ Very \ High \ Concern \ (SVHC) \ at \ the \ SDS \ print \ date.$

#### **SECTION 4 FIRST AID MEASURES**

#### 4.1. Description of first aid measures

If swallowed	do N	TOL	induce	vomiting

- ▶ If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.
- ▶ Observe the patient carefully.
- ▶ Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious.
- Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.
- ▶ Seek medical advice.
- Avoid giving milk or oils.
- Avoid giving alcohol.

#### General

- ▶ If fumes, aerosols or combustion products are inhaled remove from contaminated area.
- ▶ Other measures are usually unnecessary.

If this product comes in contact with the eyes:

- $_{\mbox{\Large \sl h}}$  Wash out immediately with fresh running water.
- ▶ Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.
- ▶ Seek medical attention without delay; if pain persists or recurs seek medical attention.
- ${\color{red} \blacktriangleright} \ {\sf Removal} \ {\sf of} \ {\sf contact} \ {\sf lenses} \ {\sf after} \ {\sf an} \ {\sf eye} \ {\sf injury} \ {\sf should} \ {\sf only} \ {\sf be} \ {\sf undertaken} \ {\sf by} \ {\sf skilled} \ {\sf personnel}.$

If skin or hair contact occurs:

- Flush skin and hair with running water (and soap if available).
- ▶ Seek medical attention in event of irritation.

# If this product comes in contact with the eyes:

# ▶ Wash out immediately with fresh running water.

### Eye Contact

- ▶ Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.
- ▶ Seek medical attention without delay; if pain persists or recurs seek medical attention.
- ▶ Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.

# Lyreco Solvent Based Correction Fluid Page 4 of 15

Issue Date: **05/10/2015**Print Date: **06/10/2015** 

	If skin or hair contact occurs:
Skin Contact	▶ Flush skin and hair with running water (and soap if available).
	▶ Seek medical attention in event of irritation.
Inhalation	▶ If fumes, aerosols or combustion products are inhaled remove from contaminated area.
	▶ Other measures are usually unnecessary.
	▶ If swallowed do <b>NOT</b> induce vomiting.
	▶ If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.
	▶ Observe the patient carefully.
Ingestion	▶ Never give liquid to a person showing signs of being sleepy or with reduced awareness; i.e. becoming unconscious.
	▶ Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably drink.
	▶ Seek medical advice.
	▶ Avoid giving milk or oils.
	▶ Avoid giving alcohol.
4.2 Most important syr	nptoms and effects, both acute and delayed
	See Section 11

# 4.3. Indication of any immediate medical attention and special treatment needed

Any material aspirated during vomiting may produce lung injury. Therefore emesis should not be induced mechanically or pharmacologically. Mechanical means should be used if it is considered necessary to evacuate the stomach contents; these include gastric lavage after endotracheal intubation. If spontaneous vomiting has occurred after ingestion, the patient should be monitored for difficult breathing, as adverse effects of aspiration into the lungs may be delayed up to 48 hours. Treat symptomatically.

#### **SECTION 5 FIREFIGHTING MEASURES**

E 4 Estimation made	#i_
5.1. Extinguishing med	aia
	▶ Foam.
	▶ Dry chemical powder.
	▶BCF (where regulations permit).
	▶ Carbon dioxide.
	▶ Water spray or fog - Large fires only.
5.2. Special hazards ar	ising from the substrate or mixture
Fire Incompatibility	▶ Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result
5.3. Advice for firefigh	ters
Fire Fighting	<ul> <li>▶ Alert Fire Brigade and tell them location and nature of hazard.</li> <li>▶ May be violently or explosively reactive.</li> <li>▶ Wear breathing apparatus plus protective gloves in the event of a fire.</li> <li>▶ Prevent, by any means available, spillage from entering drains or water course.</li> <li>▶ Consider evacuation (or protect in place).</li> </ul>
Fire/Explosion Hazard	<ul> <li>▶ Liquid and vapour are highly flammable.</li> <li>▶ Severe fire hazard when exposed to heat, flame and/or oxidisers.</li> <li>▶ Vapour may travel a considerable distance to source of ignition.</li> <li>▶ Heating may cause expansion or decomposition leading to violent rupture of containers.</li> <li>▶ On combustion, may emit toxic fumes of carbon monoxide (CO).</li> </ul> AL RELEASE MEASURES

# Lyreco Solvent Based Correction Fluid Page 5 of 15

Issue Date: 05/10/2015 Print Date: 06/10/2015

#### 6.2. Environmental precautions

See section 12

#### 6.3. Methods and material for containment and cleaning up

- ▶ Remove all ignition sources
- ▶ Clean up all spills immediately.

#### **Minor Spills**

- Avoid breathing vapours and contact with skin and eyes.
- ▶ Control personal contact with the substance, by using protective equipment.
- ▶ Contain and absorb small quantities with vermiculite or other absorbent material.

# **Major Spills**

- ▶ Clear area of personnel and move upwind.
- Alert Fire Brigade and tell them location and nature of hazard.
- ▶ May be violently or explosively reactive.
- Wear breathing apparatus plus protective gloves.
- ▶ Prevent, by any means available, spillage from entering drains or water course.

#### 6.4. Reference to other sections

Personal Protective Equipment advice is contained in Section 8 of the SDS.

#### **SECTION 7 HANDLING AND STORAGE**

#### 7.1. Precautions for safe handling

# Safe handling

- ▶ Containers, even those that have been emptied, may contain explosive vapours.
- ▶ Do NOT cut, drill, grind, weld or perform similar operations on or near containers.
  - ▶ Avoid all personal contact, including inhalation.
  - ▶ Wear protective clothing when risk of exposure occurs.

#### Fire and explosion protection

See section 5

# Other information

- ▶ Store in original containers in approved flame-proof area.
- No smoking, naked lights, heat or ignition sources.
- ▶ DO NOT store in pits, depressions, basements or areas where vapours may be trapped.
- ▶ Keep containers securely sealed.

▶ Use in a well-ventilated area.

▶ Store away from incompatible materials in a cool, dry well ventilated area.

#### 7.2. Conditions for safe storage, including any incompatibilities

# Suitable container

- ▶ Packing as supplied by manufacturer.
- ▶ Plastic containers may only be used if approved for flammable liquid.
- ▶ Check that containers are clearly labelled and free from leaks.

#### Storage incompatibility

▶ Avoid reaction with oxidising agents

### 7.3. Specific end use(s)

See section 1.2

# **SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION**

10.5. Incompatible materials	See section 7.2
10.6. Hazardous decomposition products	See section 5.3

# **SECTION 11 TOXICOLOGICAL INFORMATION**

11.1. Information on toxicological effects

i i.i. iiiioiiiiatioii oii te	Alcological chects		
Inhaled	The material is not thought to produce either adverse health effects or irritation of the respiratory tract following inhalation (as classified by EC Directives using animal models). Nevertheless, adverse systemic effects have been produced following exposure of animals by at least one other route and good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.  Not normally a hazard due to non-volatile nature of product		
Ingestion	Accidental ingestion of the material may be harmful; animal experiments indicate that ingestion of less than 150 gram may be fatal or may produce serious damage to the health of the individual.  Swallowing of the liquid may cause aspiration into the lungs with the risk of chemical pneumonitis; serious consequences may result. (ICSC13733)		
Skin Contact	The liquid may be miscible with fats or oils and may degrease the skin, producing a skin reaction described as non-allergic contact dermatitis. The material is unlikely to produce an irritant dermatitis as described in EC Directives .  Open cuts, abraded or irritated skin should not be exposed to this material		
Eye	Although the liquid is not thought to be an irritant (as classified by EC Directives), direct contact with the eye may produce transient discomfort characterised by tearing or conjunctival redness (as with windburn).		
Chronic	Long-term exposure to the product is not thought to produce chronic effects adverse to the health (as classified by EC Directives using animal models); nevertheless exposure by all routes should be minimised as a matter of course.

NAPHTHA PETROLEUM, LIGHT SOLVENT-REFINED	No significant acute toxicological data identified in literature search. for petroleum:  This product contains benzene which is known to cause acute myeloid leukaemia and n-hexane which has been shown to metabolize to compounds which are neuropathic.  This product contains toluene. There are indications from animal studies that prolonged exposure to high concentrations of toluene may lead to hearing loss.  This product contains ethyl benzene and naphthalene from which there is evidence of tumours in rodents  Carcinogenicity: Inhalation exposure to mice causes liver tumours, which are not considered relevant to humans. for full-range naphthas		
TITANIUM DIOXIDE	The material may produce moderate eye irritation leading to inflammation. Repeated or prolonged exposure to irritants may produce conjunctivitis.  The material may cause skin irritation after prolonged or repeated exposure and may produce on contact skin redness, swelling, the production of vesicles, scaling and thickening of the skin.  Exposure to titanium dioxide is via inhalation, swallowing or skin contact. When inhaled, it may deposit in lung tissue and lymph nodes causing dysfunction of the lungs and immune system.  * IUCLID		
CALCIUM CARBONATE	Asthma-like symptoms may continue for months or even years after exposure to allergenic condition known as reactive airways dysfunction syndrome (RADS) while exposure to high levels of highly irritating compound. Key criteria for the diagnosis respiratory disease, in a non-atopic individual, with abrupt onset of persistent asthminutes to hours of a documented exposure to the irritant. A reversible airflow patt of moderate to severe bronchial hyperreactivity on methacholine challenge testing without eosinophilia, have also been included in the criteria for diagnosis of RADS is an infrequent disorder with rates related to the concentration of and duration of to the irritating substance.	ch can occur following of RADS include the absence of preceding ma-like symptoms within tern, on spirometry, with the presence and the lack of minimal lymphocytic inflammation, . ✓ – Data required to make classification available

X – Data available but does not fill the criteria for classification

#### **SECTION 12 ECOLOGICAL INFORMATION**

#### 12.1. Toxicity

Toxic to aquatic organisms.

May cause long-term adverse effects in the aquatic environment.

DO NOT discharge into sewer or waterways.

# 12.2. Persistence and degradability

Ingredient	Persistence: Water/Soil	Persistence: Air
titanium dioxide	HIGH	HIGH

# 12.3. Bioaccumulative potential

Ingredient	Bioaccumulation
titanium dioxide	LOW (BCF = 10)

# 12.4. Mobility in soil

# Lyreco Solvent Based Correction Fluid Page 10 of 15

Issue Date: **05/10/2015**Print Date: **06/10/2015** 

Ingredient	Mobility
titanium dioxide	LOW (KOC = 23.74)

# 12. 5.Results of PBT and vPvB assessment

	P	В	Т
Relevant available data	Not Available	Not Available	Not Available
PBT Criteria fulfilled?	Not Available	Not Available	Not Available

#### 12.6. Other adverse effects

No data available

#### **SECTION 13 DISPOSAL CONSIDERATIONS**

A legislation addressing waste disposal requirements may differ by country, state and/ or territory. Each user must operating in their area. In some areas, certain wastes must be tracked. A Hierarchy of Controls seems to be come should investigate:  Product / Packaging disposal  Reduction ▶ Reuse  Recycling  Disposal (if all else fails)  This material may be recycled if unused, or if it has not been contaminated so as to make it unsuitable for its interest.	
Waste treatment options	If it has been contaminated, it may be possible to reclaim the product by filtration, distillation or some other means.  Not Available
Sewage disposal options	Not Available

# **SECTION 14 TRANSPORT INFORMATION**

#### SECTION 15 REGULATORY INFORMATION

#### 15.1. Safety, health and environmental regulations / legislation specific for the substance or mixture

#### NAPHTHA PETROLEUM, LIGHT SOLVENT-REFINED(64741-84-0) IS FOUND ON THE FOLLOWING REGULATORY LISTS

EU REACH Regulation (EC) No 1907/2006 - Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

EU REACH Regulation (EC) No 1907/2006 - Annex XVII (Appendix 2) Carcinogens: category 1B (Table 3.1)/category 2 (Table 3.2)

European Customs Inventory of Chemical Substances ECICS (English)

European Union - European Inventory of Existing Commercial Chemical Substances (EINECS) (English)

European Union (EU) Annex I to Directive 67/548/EEC on Classification and Labelling of Dangerous Substances - updated by ATP: 31

European Union (EU) Annex I to Directive 67/548/EEC on Classification and Labelling of Dangerous Substances (updated by ATP: 31) - Carcinogenic Substances

European Union (EU) Annex I to Directive 67/548/EEC on Classification and Labelling of Dangerous Substances (updated by ATP: 31) - Mutagenic Substances

European Union (EU) Regulation (EC) No 1272/2008 on Classification, Labelling and Packaging of Substances and Mixtures - Annex VI

International Agency for Research on Cancer (IARC) - Agents Classified by the IARC Monographs

#### TITANIUM DIOXIDE(13463-67-7) IS FOUND ON THE FOLLOWING REGULATORY LISTS

EU European Chemicals Agency (ECHA) Community Rolling Action Plan (CoRAP) List of Substances

European Customs Inventory of Chemical Substances ECICS (English) European Trade Union Confederation (ETUC) Priority List for REACH Authorisation European Union - European Inventory of Existing Commercial Chemical Substances (EINECS) (English)

International Agency for Research on Cancer (IARC) - Agents Classified by the IARC Monographs

UK Workplace Exposure Limits (WELs)

### CALCIUM CARBONATE(471-34-1) IS FOUND ON THE FOLLOWING

#### REGULATORY LISTS

European Customs Inventory of Chemical Substances ECICS (English)

European Union - European Inventory of Existing Commercial Chemical Substances (EINECS) (English)

UK Workplace Exposure Limits (WELs)

This safety data sheet is in compliance with the following EU legislation and its adaptations - as far as applicable - : 67/548/EEC, 1999/45/EC, 98/24/EC, 92/85/EC, 94/33/EC, 91/689/EEC, 1999/13/EC, Commission Regulation (EU) 2015/830, Regulation (EC) No 1272/2008 and their amendments as well as the following British legislation: - The Control of Substances Hazardous to Health Regulations (COSHH) 2002 - COSHH Essentials - The Management of Health and Safety at Work Regulations 1999

### 15.2. Chemical safety assessment

For further information please look at the Chemical Safety Assessment and Exposure Scenarios prepared by your Supply Chain if available.

National Inventory	Status
Australia - AICS	Y
Canada - DSL	Y
Canada - NDSL	N (naphtha petroleum, light solvent-refined)
China - IECSC	Y
Europe - EINEC / ELINCS / NLP	Y
Japan - ENCS	N (naphtha petroleum, light solvent-refined)
Korea - KECI	Y
New Zealand - NZIoC	Y
Philippines - PICCS	Y
USA - TSCA	Y
Legend:	Y = All ingredients are on the inventory N = Not determined or one or more ingredients are not on the inventory and are not exempt from listing(see specific ingredients in brackets)

#### **SECTION 16 OTHER INFORMATION**

# Lyreco Solvent Based Correction Fluid Page 13 of 15

Issue Date: **05/10/2015**Print Date: **06/10/2015** 

# Full text Risk and Hazard codes

H315	Causes skin irritation
H318	Causes serious eye damage
H335	May cause respiratory irritation
H340	May cause genetic defects
H350	May cause cancer
H350i	May cause cancer by inhalation.
R37/38	Irritating to respiratory system and skin.
R41	Risk of serious damage to eyes.
R45	May cause CANCER.
R46	May cause heritable genetic damage.
R49	May cause CANCER by inhalation.

# Other information

# DSD / DPD label elements

Relevant risk statements are found in section 2.1

Indication(s) of danger	F, N, Xn
SAFETY ADVICE	
S02	Keep out of reach of children.
S09	Keep container in a well ventilated place.
S13	Keep away from food, drink and animal feeding stuffs.
S16	Keep away from sources of ignition. No smoking.
S23	Do not breathe gas/fumes/vapour/spray.
S29	Do not empty into drains.
S33	Take precautionary measures against static discharges.
S35	This material and its container must be disposed of in a safe way.
S40	To clean the floor and all objects contaminated by this material, use water and detergent.
S41	In case of fire and/or explosion, DO NOT BREATHE FUMES.
\$43	In case of fire use the extinguishing media detailed in section 5 of this SDS.
S46	If swallowed, seek medical advice immediately and show this container or label.
S51	Use only in well ventilated areas.
S56	Dispose of this material and its container at hazardous or special waste collection point.
\$57	Use appropriate container to avoid environmental contamination.
S61	Avoid release to the environment.

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review using available literature references.

The (M)SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.

For detailed advice on Personal Protective Equipment, refer to the following EU CEN Standards:

EN 166 Personal eye-protection

EN 340 Protective clothing

EN 374 Protective gloves against chemicals and micro-organisms

EN 13832 Footwear protecting against chemicals

EN 133 Respiratory protective devices
