#### Upon eye contact

Rinse the eye for several minutes with lukewarm water. If irritation persists call a doctor.

## Upon skin contact

Remove contaminated clothes.

Wash the skin with soap and water.

#### Upon ingestion

Rinse nose, mouth and throat with water.

DO NOT induce vomiting.

## 4.2. Most important symptoms and effects, both acute and delayed

## Upon breathing in

Breathing may cause headache, vertigo, weakness and sickness.

## 4.3. Indication of any immediate medical attention and special treatment needed

## Symptomatic treatment.

Upon contact with a doctor, make sure to have the label or this safety data sheet with you.

# SECTION 5: FIRE-FIGHTING MEASURES

## 5.1. Extinguishing media

## Recommended extinguishing agents

Extinguish with water mist, powder, carbon dioxide or alcoholresistant foam.

# Unsuitable extinguishing agents

May not be extinguished with water dispersed under high pressure.

# 5.2. Special hazards arising from the substance or mixture

Produces fumes containing harmful gases (carbon monoxide and carbon dioxide) when burning. In case of fire, high pressure may build up causing the packaging to explode.

Do not inhale vapours and avoid contact with skin, eyes and clothes when cleaning up the spillage. Ensure good ventilation.

## 6.2. Environmental precautions

Avoid release to drains, soil or watercourses.

## 6.3. Methods and material for containment and cleaning up

Small spills can be wiped up with a cloth or similar. Then flush the spill site with water. Larger spills should first be covered with sand or earth and then be collected. Collected material should be disposed according to Section 13.

## 16c. Key literature references and sources for data

## Sources for data

Primary data for the calculation of the hazards has preferentially been taken from the official European classification list, 1272/2008 Annex I, as updated to 2016-12-28.

Where such data was not available, alternative documentation used to establish the official classification was used, e.g. IUCLID (International Uniform Chemical Information Database). As a second alternative, information was used from reputable international chemical industries, and as a third alternative other available information was used, e.g. material safety data sheets from other suppliers or information from non-profit associations, where reliability of the source was assessed by expert opinion. If, in spite of this, reliable information could not be sourced, the hazards were assessed by expert opinions based on the known hazards of similar substances, and according to the principles in 1907/2006 and 1272/2008.
