

# Safety Data Sheet according to (EC) No 1907/2006 as amended

Page 1 of 17

SDS No.: 436573 V003.1

Revision: 16.12.2020

printing date: 18.12.2021

Replaces version from: 15.08.2017

Loctite Super Glue Power Flex Gel Control

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

Loctite Super Glue Power Flex Gel Control

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use: Super glue

#### 1.3. Details of the supplier of the safety data sheet

Henkel Ltd Adhesives Wood Lane End

HP2 4RQ Hemel Hempstead

Great Britain

Phone: +44 (1442) 278000 Fax-no.: +44 (1442) 278071

ua-productsafety.uk@henkel.com

### 1.4. Emergency telephone number

24 Hours Emergency Tel: +44 0 8701 906777 - For further general health & safety, technical and practical advice on this product, please call +44 (0) 1606 593933 or write to: Technical Services; Henkel Limited; Road 5; Winsford Industrial Estate; Winsford; Cheshire; CW7 3QY- Email: technical.services@henkel.co.uk

# **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

# Classification (CLP):

Skin irritation Category 2

H315 Causes skin irritation.

Serious eye irritation Category 2

H319 Causes serious eye irritation.

Specific target organ toxicity - single exposure Category 3

H335 May cause respiratory irritation. Target organ: respiratory tract irritation

#### 2.2. Label elements

# Label elements (CLP):

Hazard pictogram:

Contains Ethyl 2-cyanoacrylate

Signal word: Warning

**Hazard statement:** H315 Causes skin irritation.

H319 Causes serious eye irritation. H335 May cause respiratory irritation.

Supplemental information EUH202 Cyanoacrylate. Danger. Bonds skin and eyes in seconds. Keep out of the reach of

children.

**Precautionary statement:** P261 Avoid breathing vapors.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove

contact lenses, if present and easy to do. Continue rinsing. P302+P352 IF ON SKIN: Wash with plenty of soap and water.

**Precautionary statement:** 

Disposal

P501 Dispose of contents/container in accordance with national regulation.

#### 2.3. Other hazards

Persons suffering from allergic reactions to acrylates should avoid contact with the product. Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria.

# **SECTION 3: Composition/information on ingredients**

### 3.2. Mixtures

General chemical description:

Cyanoacrylate Adhesive

Base substances of preparation:

Cyanoacrylate

#### Declaration of the ingredients according to CLP (EC) No 1272/2008:

| Hazardous components<br>CAS-No.                                   | EC Number<br>REACH-Reg No.    | content      | Classification   |

For full text of the H - statements and other abbreviations see section 16 "Other information". Substances without classification may have community workplace exposure limits available.

# **SECTION 4: First aid measures**

### 4.1. Description of first aid measures

#### General information:

In case of adverse health effects seek medical advice.

### Inhalation:

Move to fresh air, consult doctor if complaint persists.

# Skin contact:

Do not pull bonded skin apart. It may be gently peeled apart using a blunt object such as a spoon, preferably after soaking in warm soapy water.

Cyanoacrylates give off heat on solidification. In rare cases a large drop will generate enough heat to cause a burn.

Burns should be treated normally after the adhesive has been removed from the skin.

If lips are accidentally stuck together apply warm water to the lips and encourage maximum wetting and pressure from saliva inside the mouth.

Peel or roll lips apart. Do not try to pull the lips apart with direct opposing action.

#### Eye contact:

If the eye is bonded closed, release eyelashes with warm water by covering with wet pad.

Cyanoacrylate will bond to eye protein and will cause periods of weeping which will help to debond the adhesive.

Keep eye covered until debonding is complete, usually within 1-3 days.

Do not force eye open. Medical advice should be sought in case solid particles of cyanoacrylate trapped behind the eyelid cause any abrasive damage.

### Ingestion:

Ensure that breathing passages are not obstructed. The product will polymerise immediately in the mouth making it almost impossible to swallow. Saliva will slowly separate the solidified product from the mouth (several hours).

### 4.2. Most important symptoms and effects, both acute and delayed

SKIN: Redness, inflammation.

RESPIRATORY: Irritation, coughing, shortness of breath, chest tightness.

Causes serious eye irritation.

#### 4.3. Indication of any immediate medical attention and special treatment needed

See section: Description of first aid measures

### **SECTION 5: Firefighting measures**

#### 5.1. Extinguishing media

#### Suitable extinguishing media:

carbon dioxide, foam, powder, water spray jet, fine water spray

### Extinguishing media which must not be used for safety reasons:

High pressure waterjet

#### 5.2. Special hazards arising from the substance or mixture

In the event of a fire, carbon monoxide (CO) and carbon dioxide (CO2) can be released.

#### 5.3. Advice for firefighters

Wear protective equipment.

Wear self-contained breathing apparatus.

### **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

Wear protective equipment.

Danger of slipping on spilled product.

Ensure adequate ventilation.

Avoid contact with skin and eyes.

#### 6.2. Environmental precautions

Do not empty into drains / surface water / ground water.

#### 6.3. Methods and material for containment and cleaning up

Remove with liquid-absorbing material (sand, peat, sawdust).

Dispose of contaminated material as waste according to Section 13.

#### 6.4. Reference to other sections

See advice in section 8

# **SECTION 7: Handling and storage**

### 7.1. Precautions for safe handling

Open and handle container with care.

Ensure that workrooms are adequately ventilated.

Avoid skin and eye contact.

#### Hygiene measures:

Do not eat, drink or smoke while working.

Wash hands before work breaks and after finishing work.

# 7.2. Conditions for safe storage, including any incompatibilities

Keep container tightly sealed.

Store in a cool, dry place.

For optimum shelf life store in original containers under refrigerated conditions at 2 - 8°C (35.6 - 46.4 °F)

Do not store together with food or other consumables (coffee, tea, tobacco, etc.).

# 7.3. Specific end use(s)

Super glue

# **SECTION 8: Exposure controls/personal protection**

# 8.1. Control parameters

# **Occupational Exposure Limits**

Valid for

Great Britain

# **Biological Exposure Indices:**

None

# 8.2. Exposure controls:

Respiratory protection: Suitable breathing mask when there is inadequate ventilation.

Combination filter: ABEKP (EN 14387)

This recommendation should be matched to local conditions.

Hand protection:

Recommended are gloves made from Nitril rubber (Material thickness >0,1 mm, Perforation time < 30s). Gloves should be replaced after each short time contact or contamination. Available at laboratory specialized trade or at pharmacies / chemist's shops.

In the case of longer contact protective gloves made from nitrile rubber are recommended according to EN 374. material thickness > 0.4 mm

Perforation time > 30 minutes

In the case of longer and repeated contact please note that in practice the penetration times may be considerably shorter than those determined according to EN 374. The protective gloves must always be checked for their suitability for use at the specific workplace (e.g. mechanical and thermal stress, product compatibility, antistatic effects, etc.). The gloves must be replaced immediately at the first signs of wear and tear. The information provided by the manufacturers and given in the relevant trade association regulations for industrial safety must always be observed. We recommend that a hand care plan is drawn up in cooperation with a glove manufacturer and the trade association in accordance with the local operating conditions.

Eve protection:

Goggles which can be tightly sealed.

Protective eye equipment should conform to EN166.

Skin protection:

Suitable protective clothing

Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

Advices to personal protection equipment:

The information provided on personal protective equipment is for guidance purposes only. A full risk assessment should be conducted prior to using this product to determine the appropriate personal protective equipment to suit local conditions. Personal protective equipment should conform to the relevant EN standard.

### **SECTION 9: Physical and chemical properties**

#### 9.1. Information on basic physical and chemical properties

Appearance gel

clear to slightly cloudy colourless

Odor characteristic

Odour threshold No data available / Not applicable

pH Not applicable

Melting point
No data available / Not applicable
Solidification temperature
No data available / Not applicable

Initial boiling point  $> 100 \,^{\circ}\text{C} (> 212 \,^{\circ}\text{F})$ 

Flash point 80 - 93 °C (176 - 199.4 °F); Tagliabue closed cup

Evaporation rate No data available / Not applicable Flammability No data available / Not applicable Explosive limits No data available / Not applicable

Vapour pressure < 0,5 mbar

(25 °C (77 °F))

Relative vapour density: No data available / Not applicable

Density 1,1000 g/cm3

(23,9 °C (75 °F))

Bulk density

No data available / Not applicable
Solubility

No data available / Not applicable
Solubility (qualitative)

Polymerises in presence of water.

(23 °C (73.4 °F); Solvent: Water)

Partition coefficient: n-octanol/water
Auto-ignition temperature

No data available / Not applicable

Viscosity >= 2.000 mPa.s

(Cone and plate; Instrument: Physica MC 100 (or equivalent), Cone MK 22; 25 °C (77 °F);

Shear gradient: 20 s-1)

Viscosity (kinematic)

Explosive properties

No data available / Not applicable

No data available / Not applicable

No data available / Not applicable

#### 9.2. Other information

No data available / Not applicable

# **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

Rapid exothermic polymerization will occur in the presence of water, amines, alkalis and alcohols.

#### 10.2. Chemical stability

Stable under recommended storage conditions.

#### 10.3. Possibility of hazardous reactions

See section reactivity

#### 10.4. Conditions to avoid

None if used for intended purpose.

#### 10.5. Incompatible materials

See section reactivity.

### 10.6. Hazardous decomposition products

None known.

# **SECTION 11: Toxicological information**

# General toxicological information:

Persons suffering from allergic reactions to acrylates should avoid contact with the product.

### 11.1. Information on toxicological effects

### Acute oral toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances  | Value | Value          | Species | Method                                   |
|---|-------|----------------|---------|--|
| CAS-No.   | type  |                |         |  |
| Ethyl 2-cyanoacrylate 7085-85-0                                       | LD50  | > 5.000 mg/kg  | rat     | OECD Guideline 401 (Acute Oral Toxicity) |
| Bis(2-hydroxy-3-tert-<br>butyl-5-<br>methylphenyl)methane<br>119-47-1 | LD50  | > 10.000 mg/kg | rat     | not specified                            |
| Hydroquinone 123-31-9   | LD50  | 367 mg/kg      | rat     | OECD Guideline 401 (Acute Oral Toxicity) |

#### Acute dermal toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances  | Value | Value          | Species | Method                                     |
|-----------------------|-------|----------------|---------|--|
| CAS-No.               | type  |                |         |  |
| Ethyl 2-cyanoacrylate | LD50  | > 2.000 mg/kg  | rabbit  | OECD Guideline 402 (Acute Dermal Toxicity) |
| 7085-85-0             |       |                |         |  |
| Bis(2-hydroxy-3-tert- | LD50  | > 10.000 mg/kg | rat     | not specified                              |
| butyl-5-              |       |                |         |  |
| methylphenyl)methane  |       |                |         |  |
| 119-47-1              |       |                |         |  |
| Hydroquinone          | LD50  | > 2.000 mg/kg  | rabbit  | OECD Guideline 402 (Acute Dermal Toxicity) |
| 123-31-9              |       |                |         |  |

# Acute inhalative toxicity:

No substance data available. No data available.

### Skin corrosion/irritation:

Bonds skin in seconds. Considered to be of low toxicity: acute dermal LD50 (rabbit)>2000mg/kg Due to polymerisation at the skin surface allergic reaction is unlikely to occur

| Hazardous substances  | Result         | Exposure | Species | Method   |
|-----------------------|----------------|----------|---------|--|
| CAS-No.               |                | time     |         |  |
| Ethyl 2-cyanoacrylate | slightly       | 24 h     | rabbit  | OECD Guideline 404 (Acute Dermal Irritation / Corrosion) |
| 7085-85-0             | irritating     |          |         |  |
| Hydroquinone          | not irritating | 24 h     | rabbit  | Weight of evidence                                       |
| 123-31-9              |                |          |         |  |

### Serious eye damage/irritation:

Liquid product will bond eyelids. In a dry atmosphere (RH<50%) vapours may cause irritation and lachrymatory effect

| Hazardous substances CAS-No. | Result     | Exposure time | Species | Method  |
|------------------------------|------------|---------------|---------|---|
| Ethyl 2-cyanoacrylate        | irritating | 72 h          | rabbit  | OECD Guideline 405 (Acute Eye Irritation / Corrosion) |
| 7085-85-0                    |            |               |         |   |

### Respiratory or skin sensitization:

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances  | Result          | Test type               | Species    | Method                                  |
|-----------------------|-----------------|-------------------------|------------|---|
| CAS-No.               |                 |                         |            |   |
| Ethyl 2-cyanoacrylate | not sensitising |                         | guinea pig | not specified                           |
| 7085-85-0             |                 |                         |            |   |
| Hydroquinone          | sensitising     | Guinea pig maximisation | guinea pig | equivalent or similar to OECD Guideline |
| 123-31-9              |                 | test                    |            | 406 (Skin Sensitisation)                |
| Hydroquinone          | sensitising     | Mouse local lymphnode   | mouse      | equivalent or similar to OECD Guideline |
| 123-31-9              |                 | assay (LLNA)            |            | 429 (Skin Sensitisation: Local Lymph    |
|                       |                 | -                       |            | Node Assay)                             |

# Germ cell mutagenicity:

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances CAS-No.  | Result   | Type of study /<br>Route of<br>administration          | Metabolic<br>activation /<br>Exposure time | Species | Method   |
|---|----------|--|--|---------|--|

# Aspiration hazard:

No data available.

# **SECTION 12: Ecological information**

# General ecological information:

Do not empty into drains, soil or bodies of water.

# 12.1. Toxicity

# **Toxicity (Fish):**

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances                                       | Value | Value                       | Exposure time | Species             | Method  |
|--|-------|-----------------------------|---------------|---------------------|---|
| CAS-No.  | type  |                             |               |                     |   |
| Bis(2-hydroxy-3-tert-butyl-5-methylphenyl)methane 119-47-1 | LC50  | Toxicity > Water solubility |               | Oryzias latipes     | OECD Guideline 203 (Fish,<br>Acute Toxicity Test) |
| Hydroquinone 123-31-9                                      | LC50  | 0,638 mg/l                  | 96 h          | Oncorhynchus mykiss | OECD Guideline 203 (Fish, Acute Toxicity Test)    |

# Toxicity (Daphnia):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances          | Value | Value            | Exposure time | Species       | Method               |
|-------------------------------|-------|------------------|---------------|---------------|----------------------|
| CAS-No.                       | type  |                  |               |               |                      |
| Bis(2-hydroxy-3-tert-butyl-5- | EC50  | Toxicity > Water | 48 h          | Daphnia magna | OECD Guideline 202   |
| methylphenyl)methane          |       | solubility       |               |               | (Daphnia sp. Acute   |
| 119-47-1                      |       |                  |               |               | Immobilisation Test) |
| Hydroquinone                  | EC50  | 0,134 mg/l       | 48 h          | Daphnia magna | OECD Guideline 202   |
| 123-31-9                      |       |                  |               |               | (Daphnia sp. Acute   |
|                               |       |                  |               |               | Immobilisation Test) |

### Chronic toxicity to aquatic invertebrates

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances                                       | Value | Value                       | Exposure time | Species       | Method   |
|--|-------|-----------------------------|---------------|---------------|--|
| CAS-No.  | type  |                             |               |               |  |
| Bis(2-hydroxy-3-tert-butyl-5-methylphenyl)methane 119-47-1 | NOEC  | Toxicity > Water solubility |               | Daphnia magna | OECD 211 (Daphnia<br>magna, Reproduction Test) |
| Hydroquinone<br>123-31-9                                   | NOEC  | 0,0057 mg/l                 | 21 d          | Daphnia magna | OECD 211 (Daphnia magna, Reproduction Test)    |

### Toxicity (Algae):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances                                       | Value | Value                       | Exposure time | Species   | Method   |
|--|-------|-----------------------------|---------------|---|--|
| CAS-No.  | type  |                             |               |   |  |
| Bis(2-hydroxy-3-tert-butyl-5-methylphenyl)methane          |       | Toxicity > Water solubility | 72 h          |   | OECD Guideline 201 (Alga, Growth Inhibition Test)    |
| 119-47-1   |       |                             |               | capricornutum)  | ·  |
| Bis(2-hydroxy-3-tert-butyl-5-methylphenyl)methane 119-47-1 |       | Toxicity > Water solubility | 72 h          | Pseudokirchneriella subcapitata<br>(reported as Selenastrum<br>capricornutum) | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |
| Hydroquinone<br>123-31-9                                   | EC50  | 0,335 mg/l                  | 72 h          | Selenastrum capricornutum<br>(new name: Pseudokirchneriella<br>subcapitata)   | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |

# Toxicity to microorganisms

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances          | Value | Value         | Exposure time | Species | Method                       |
|-------------------------------|-------|---------------|---------------|---------|------------------------------|
| CAS-No.                       | type  |               |               |         |                              |
| Bis(2-hydroxy-3-tert-butyl-5- | EC 50 | > 10.000 mg/l | 3 h           |         | OECD Guideline 209           |
| methylphenyl)methane          |       |               |               |         | (Activated Sludge,           |
| 119-47-1                      |       |               |               |         | Respiration Inhibition Test) |
| Hydroquinone                  | EC 50 | 0,038 mg/l    | 30 min        |         | not specified                |
| 123-31-9                      |       |               |               |         |                              |

# 12.2. Persistence and degradability

| Hazardous substances<br>CAS-No.                            | Result  | Test type | Degradability | Exposure<br>time | Method   |
|--|---|-----------|---------------|------------------|--|
| Ethyl 2-cyanoacrylate 7085-85-0                            | not readily biodegradable.                          | aerobic   | 57 %          | 28 d             | OECD Guideline 301 D (Ready<br>Biodegradability: Closed Bottle<br>Test)                    |
| Bis(2-hydroxy-3-tert-butyl-5-methylphenyl)methane 119-47-1 | under test conditions no<br>biodegradation observed | aerobic   | 0 %           | 28 d             | OECD Guideline 301 C (Ready<br>Biodegradability: Modified MITI<br>Test (I))                |
| Hydroquinone<br>123-31-9                                   | readily biodegradable                               | aerobic   | 75 - 81 %     | 30 d             | EU Method C.4-E (Determination<br>of the "Ready"<br>BiodegradabilityClosed Bottle<br>Test) |

# 12.3. Bioaccumulative potential

| Hazardous substances          | Bioconcentratio | Exposure time | Temperature | Species         | Method                         |
|-------------------------------|-----------------|---------------|-------------|-----------------|--------------------------------|
| CAS-No.                       | n factor (BCF)  |               |             |                 |                                |
| Bis(2-hydroxy-3-tert-butyl-5- | 320 - 780       | 60 d          |             | Cyprinus carpio | OECD Guideline 305 E           |
| methylphenyl)methane          |                 |               |             |                 | (Bioaccumulation: Flow-through |
| 119-47-1                      |                 |               |             |                 | Fish Test)                     |

# 12.4. Mobility in soil

| Hazardous substances  | LogPow | Temperature | Method   |
|---|--------|-------------|--|
| CAS-No.   |        |             |  |
| Ethyl 2-cyanoacrylate 7085-85-0                               | 0,776  | 22 °C       | EU Method A.8 (Partition Coefficient)  |
| Bis(2-hydroxy-3-tert-butyl-5-methylphenyl)methane<br>119-47-1 | 6,25   | 20 °C       | OECD Guideline 107 (Partition Coefficient (n-octanol / water), Shake Flask Method) |
| Hydroquinone<br>123-31-9                                      | 0,59   |             | EU Method A.8 (Partition Coefficient)  |

### 12.5. Results of PBT and vPvB assessment

| Hazardous substances          | PBT / vPvB   |
|-------------------------------|--|
| CAS-No.                       |  |
| Ethyl 2-cyanoacrylate         | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 7085-85-0                     | Bioaccumulative (vPvB) criteria.   |
| Bis(2-hydroxy-3-tert-butyl-5- | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| methylphenyl)methane          | Bioaccumulative (vPvB) criteria.   |
| 119-47-1                      |  |
| Hydroquinone                  | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 123-31-9                      | Bioaccumulative (vPvB) criteria.   |

### 12.6. Other adverse effects

No data available.

# **SECTION 13: Disposal considerations**

### 13.1. Waste treatment methods

Product disposal:

Dispose of waste and residues in accordance with local authority requirements.

Disposal of uncleaned packages: Use packages for recycling only when totally empty.

Waste code 080409

# **SECTION 14: Transport information**

#### 14.1. UN number

ADR Not dangerous goods
RID Not dangerous goods
ADN Not dangerous goods
IMDG Not dangerous goods
IATA 3334

### 14.2. UN proper shipping name

ADR Not dangerous goods
RID Not dangerous goods
ADN Not dangerous goods
IMDG Not dangerous goods

IATA Aviation regulated liquid, n.o.s. (Cyanoacrylate ester)

#### 14.3. Transport hazard class(es)

ADR Not dangerous goods
RID Not dangerous goods
ADN Not dangerous goods

IATA not applicable

#### 14.6. Special precautions for user

ADR not applicable RID not applicable ADN not applicable IMDG not applicable

IATA Primary packs containing less than 500ml are unregulated by this mode of transport

and may be shipped unrestricted.

### 14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

not applicable

# **SECTION 15: Regulatory information**

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Ozone Depleting Substance (ODS) (Regulation 1005/2009/EC):

Prior Informed Consent (PIC) (Regulation 649/2012/EC):

Persistent Organic Pollutants (POPs) (Regulation 2019/1021/EC):

Not applicable

Not applicable

### EU. REACH, Annex XVII, Marketing and Use Restrictions (Regulation 1907/2006/EC): Not applicable

VOC content 0,0 % (VOCV 814.018 VOC regulation CH)

#### 15.2. Chemical safety assessment

A chemical safety assessment has been carried out.

#### **SECTION 16: Other information**

The labelling of the product is indicated in Section 2. The full text

of all abbreviations indicated by codes in this safety data sheet are as follows:

H302 Harmful if swallowed.

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

H318 Causes serious eye damage.

H319 Causes serious eye irritation.

H335 May cause respiratory irritation.

H341 Suspected of causing genetic defects.

H351 Suspected of causing cancer.

H361 Suspected of damaging fertility or the unborn child.

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects.

#### **Further information:**

This Safety Data Sheet has been produced for sales from Henkel to parties purchasing from Henkel, is based on Regulation (EC) No 1907/2006 and provides information in accordance with applicable regulations of the European Union only. In that respect, no statement, warranty or representation of any kind is given as to compliance with any statutory laws or regulations of any other jurisdiction or territory other than the European Union. When exporting to territories other than the European Union, please consult with the respective Safety Data Sheet of the concerned territory to ensure compliance or liaise with Henkel's Product Safety and Regulatory Affairs Department (ua-productsafety.de@henkel.com) prior to export to other territories than the European Union.

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.

#### Dear Customer,

Henkel is committed to creating a sustainable future by promoting opportunities along the entire value chain. If you would like to contribute by switching from a paper to the electronic version of SDS, please contact the local Customer Service representative. We recommend to use a non-personal email address (e.g. SDS@your\_company.com).

Relevant changes in this safety data sheet are indicated by vertical lines at the left margin in the body of this document. Corresponding text is displayed in a different color on shadowed fields.

### **Annex - Exposure Scenarios:**

Exposure Scenarios for ethyl 2-cyanoacrylate can be downloaded under the following link: http://mymsds.henkel.com/mymsds/.470833..en.ANNEX\_DE.15743123.0.DE.pdf
Alternatively they can be accessed on the internet site www.mymsds.henkel.com by entering number 470833.
