

2210 BANKNOTE COUNTER WITH UV COUNTERFEIT DETECTION

Save time and eliminate all chance of error. The Safescan 2210's back-loading hopper can hold up to 300 banknotes and accurately count them, up to 1,000 notes per minute. The 2210 automatically checks every banknote for two distinct security traits: UV markings and bill size. It will pause and beep to alert you when it encounters a suspicious bill; simply remove the offender and press start to resume counting. The spacious backlit LCD screen tells you exactly what you need to know: the number of notes counted and the specific count and detection settings you've selected.

- Fast and reliable banknote counter with UV counterfeit detection
- Counts 1,000 notes/minute
- Quick and easy to use
- Auto start and stop function
- For all currencies
- Add and batch function
- Alarm when suspected or different sized banknote is detected
- Intuitive User Interface
