

145W USB-C GaN Travel Charger with 4 Ports

Compact 4 port 145W PD 3.1 GaN charger powers pro-grade laptops, tablets, and phones simultaneously

Capable of 145W PD 3.1 charging speeds through either of the top 2 USB-C ports, allowing you to fast charge a MacBook Pro 16-inch at the fastest possible speeds, from 0-50% in about 28 minutes.¹

Adapts in real-time to deliver the perfect wattage that your device demands with Programmable Power Supply (PPS). PPS provides a variable amount of power to your device depending on the wattage that it requires – up to the max wattage of each port.

The HyperJuice GaN Charger is 22% cooler than a leading charger brand. With its efficient thermal management and safe operation, Hyper's advanced GaN (Gallium Nitride) technology allows for more efficient power conversion, leading to a cooler charging experience.

Interchangeable travel adapters for over 150 countries (US, EU, UK and ANZ) are included, eliminating the need to carry additional converters. Our adapters securely lock into place, providing a more secure solution than adapters that slide over the US plugs.

Transform your wall charger into a desktop charging station using the included C8 adapter, designed specifically for US plugs³. It provides a more secure attachment to the wall outlet and flexibility to extend your reach.

Supported by charging protocols including PD 3.1, PPS, QC 3.0, and QC 2.0, HYPERJuice 100W GaN Travel Charger is compatible with approximately 1,000+ devices. Whether you need to power your pro laptop, tablet, phone or headphones, we've got you covered.

³ AC power cord sold separately.

- USB-C1: 140W Max – PD 3.1 and PPS
- USB-C2: 140W Max – PD 3.1 and PPS
- USB-C3: 45W Max – PD 3.0 and PPS
- USB-A1: 18W Max – QC 2.0, 3.0

Commercial Grade Design & Safety

The new HyperJuice GaN lineup sets a new standard for charging efficiency and reliability, operating 22% cooler to ensure uninterrupted power and long-lasting performance. With upgraded safety features, industry-leading testing, third-party certifications, and intelligent chips, our chargers protect against over-voltage, over-current, over-temperature, and over-powering in any climate.

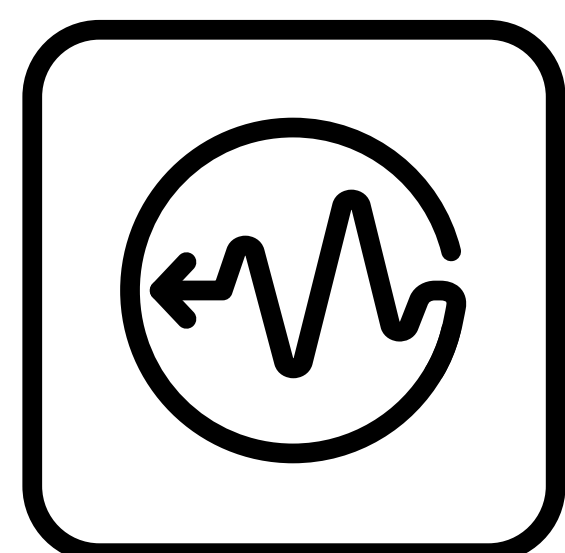

Charge safely with industry-leading testing, third-party certifications, and intelligent chips.
