01

Methodology

Environmental Impact Assessment

<p>Functional unit</p>	<p>The functional unit is a quantified performance of a product system for use as a reference unit. One of the primary purposes of a functional unit is to provide a reference to which the input and output data are normalized (in a mathematical sense). The functional unit of this analysis is "4 set(s) of bound pages of paper for the purpose of writing".</p>
<p>Impact Indicator</p>	<p>The impact is measured through the "IPCC 2013 GWP 100a" method.</p>
<p>Electricity impact calculation method</p>	<p>Following guidelines from the GHG Protocol, the impact of electricity is calculated using the location-based approach. This means that the emission factors used represent the average annual carbon intensity of the power grid in the country the processes take place in.</p>
<p>Hypothesis</p>	

Environmental Impact Assessment

System Boundaries

The scope of this research includes the complete lifecycle of a notebook from raw material extraction to disposal options for each material, which is the cradle-to-grave perspective.

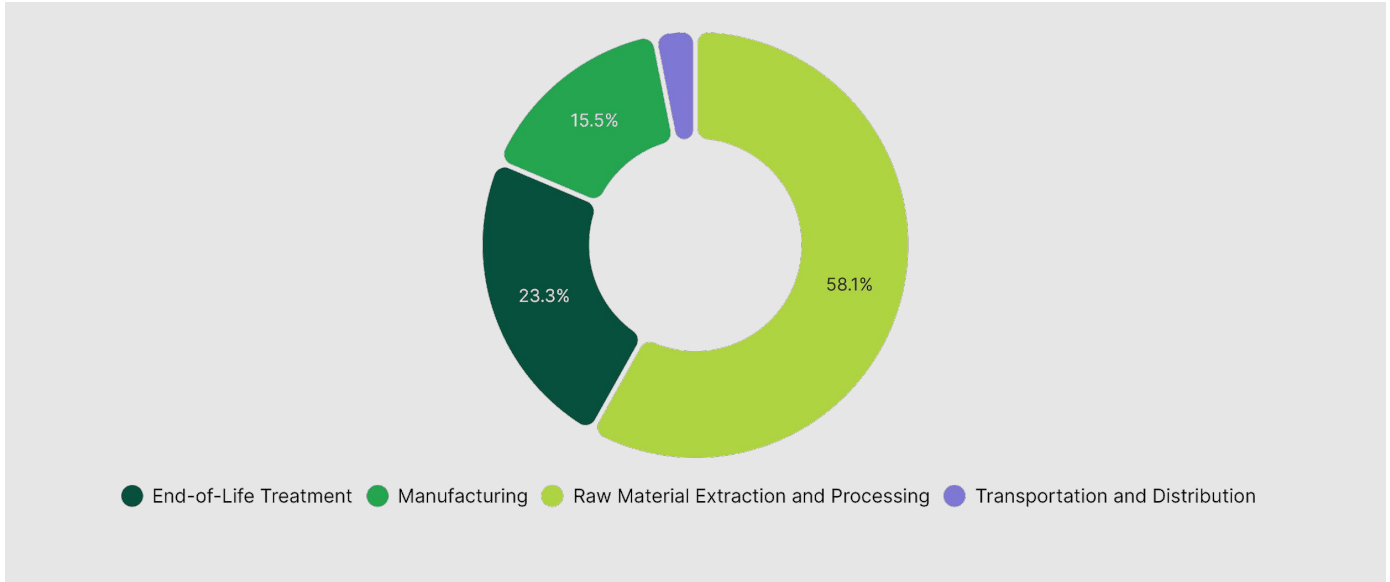

Exclusions

The impact of secondary packaging and writing utensils are excluded from this assessment.

02

Results

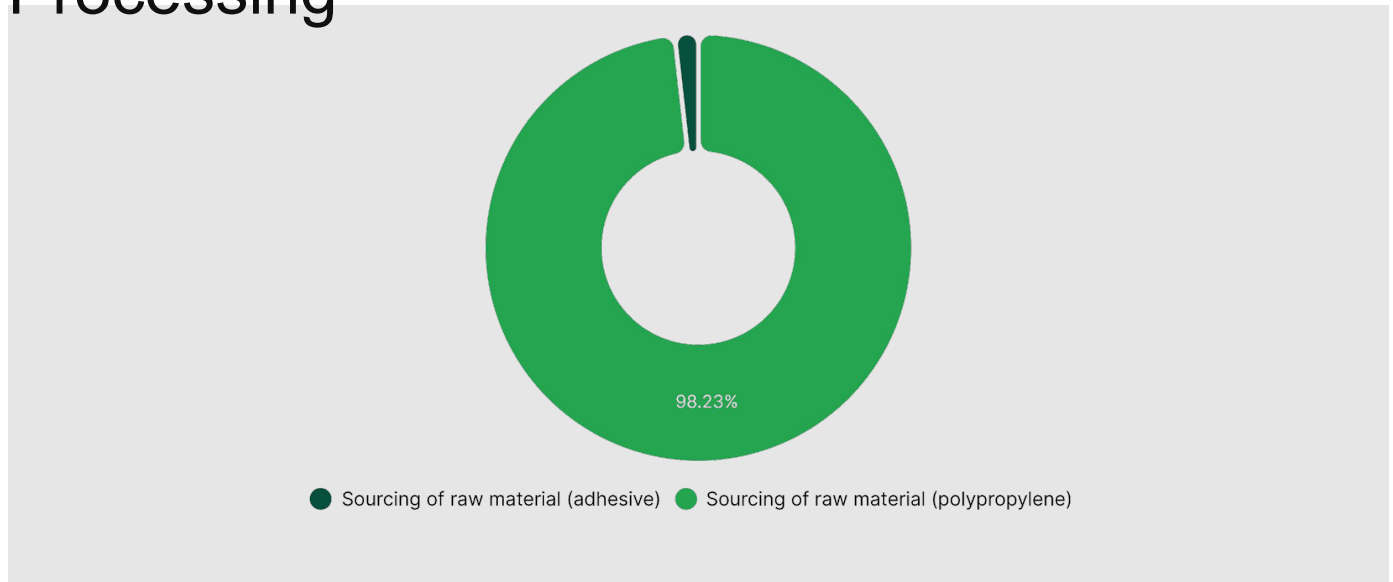

1500802 (sold in PL)
Climate Change

Step	Impact (g CO ₂ eq)	Percentage (%)
Raw Material Extraction and Processing	54.66	58.12 %
End-of-Life Treatment	21.87	23.26 %
Manufacturing	14.59	15.51 %
Transportation and Distribution	2.92	3.11 %
TOTAL	94.04	100.00 %

1500802 (sold in PL)

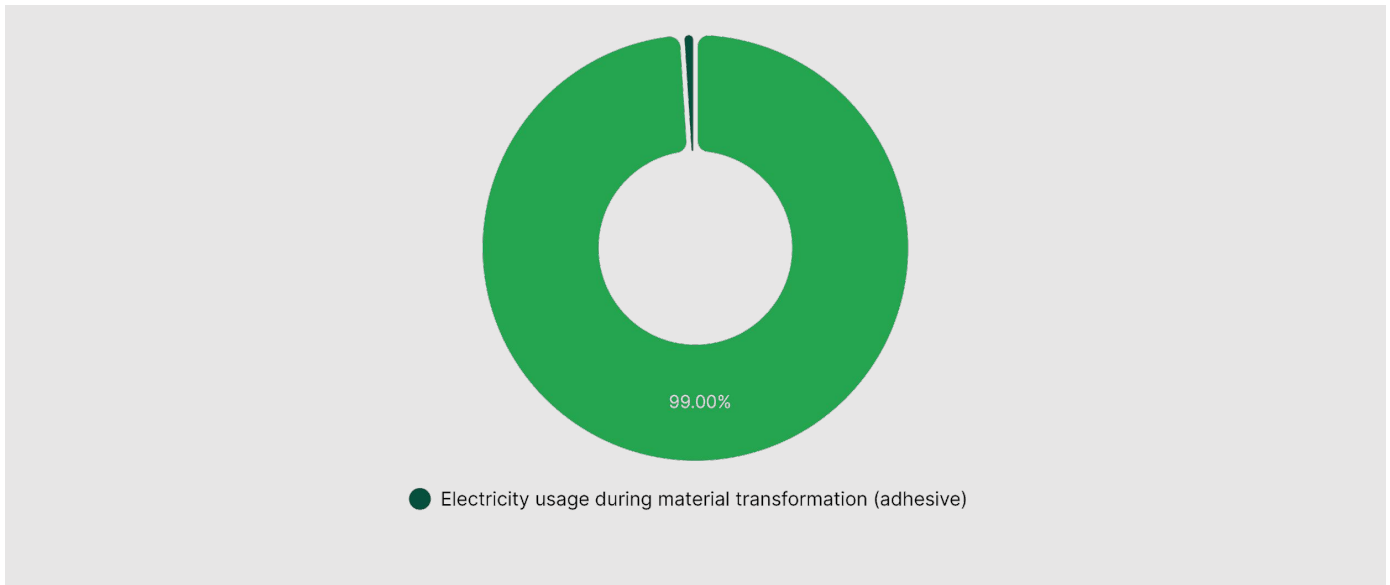

Climate Change - Raw Material Extraction and Processing

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
Sourcing of raw material (polypropylene)	1	0.02	53.69	98.23 %
Sourcing of raw material (adhesive)	2	1.77 · 10 ⁻⁴	0.97	1.77 %
TOTAL			54.66	100.00 %

1500802 (sold in PL)

Climate Change - Manufacturing

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
Electricity usage during material transformation (polypropylene)	3	0.03	14.44	99.00 %
Electricity usage during material transformation (adhesive)	3	3.3 · 10 ⁻⁴	0.15	1.00 %
TOTAL			14.59	100.00 %

1500802 (sold in PL)

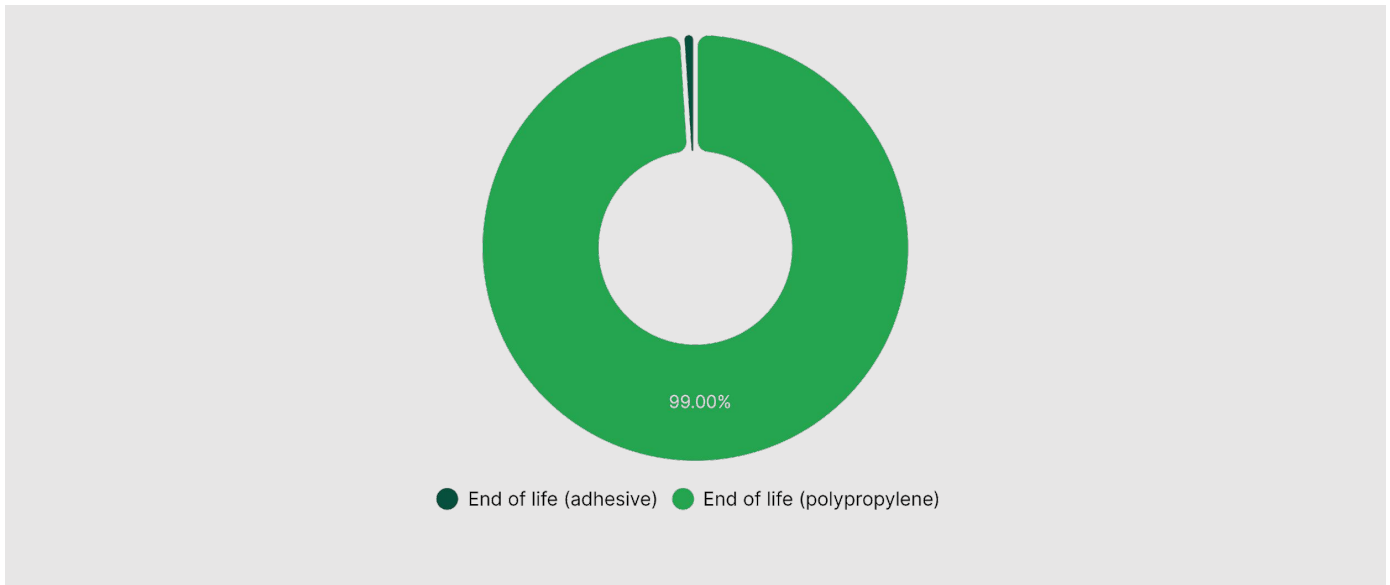

Climate Change - Transportation and Distribution

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
Freight	4	0.02	2.92	100.00 %
TOTAL			2.92	100.00 %

1500802 (sold in PL)

Climate Change - End-of-Life Treatment

Activity	Emission Factor Num	Quantity	Impact (g CO ₂ eq)	Percentage (%)
End of life (polypropylene)	5	0.02	21.66	99.00 %
End of life (adhesive)	5	1.61 · 10 ⁻⁴	0.22	1.00 %
TOTAL			21.87	100.00 %
