Composition	Diverter (Colours) - PVC, Polyester; Diverter (Clear) - PVC w/ Polyester Reinforcement; Straps – Rubber
Contents/Package	1 Leak Diverter, 1 drain fitting and 4 rubber straps
Dimensions	ext. dia. 61cm x 61cm H
Warnings & Restrictions	Not suitable for temperatures over 77°C.
Recycled Content	N/A
Sold as	0

Description

Hangs from pipes to divert leaks to floor drains or containers via a drainage hose ensuring walkways and work areas are kept dry and safe, helping to prevent damage and slip accidents

Flow rate is 12.6L per minute when used with 1.2cm ID Drainage Hose (hose sold separately)

Built-in eyelets and rubber straps (included) make it easy to hang from an overhead pipe

Nonpermeable tarp is vinyl-coated for strength and durability; resists punctures, UV and mildew for long life

Optional coloured material is also flame-resistant for additional safety -- choose yellow for high visibility, grey to blend with plant ceilings or clear to easily monitor leaks
