

LASER ROLLS

Multifunctional

Description

These rolls for laser copiers present excellent characteristics: good laser aptitude, dimensional stability, no curling after the heated section of the copier, good folding resistance.

In black monochrome, these rolls are the reference for plan printing or copying. The highly homogenous paper surface, the perfect suitability for folding and hole-punching mean that they are the ideal base for your big print runs. The 168 CIE whiteness level makes the printed document easy to read.

Applications

Wide format laser printing, black & white or colours
