

Light Duty Shelving

Ideal for organizing and tidying up your space

Description

Duty shelving systems are **highly versatile storage solutions** with a wide range of sizes and finishes. They help maximize space utilization, keep facilities organized, and optimize workflow processes in warehouses. Ideal for archive storage, storage areas, retail, garage, shed, and the office.

The product is constructed with steel and feature a powder-coated paint finish for added durability. The tapered fit design enhances stability, ensuring the shelving can safely support heavy loads. This shelving system can be disassembled, allowing users to modify the height and length as needed, providing **flexibility** for different storage requirements.

Duty shelving systems offers efficient, organized, and versatile storage solutions for various settings, with a particular focus on **maximizing space utilization** and optimizing workflow processes in warehouses. They also aim to tidy up spaces and provide stability and durability for safe storage of items. Also allow for the creation of various other elements such as bases, tables, and different structures. The excellent versatility and easy assembly, without screws, contribute to the overall convenience and efficiency of the system.

Features

Solid steel construction with a powder coated paint finish;
Steel sheet shelves, removable and adjustable, available in various dimensions, designed to hold loads of up to 136kg per level (P400mm/ with simple access) and 182kg (P600mm/ with double access). Adjustment of shelf height every 50mm.
Possibility of adding one or more complementary elements to the base structure.
Upright Profile with joint. Easy assembly, without screws;
Basic: includes 4 uprights, 6 steel shelves structures, 4 plastic foot;
Complementary: includes 2 upright post, 6 steel shelves structures, 2 plastic foot;

Personas

Warehouse Managers

Warehouse managers and logistics professionals are responsible for optimizing storage and workflow efficiency in warehouses, and the shelving systems can help them achieve better organization, space utilization, and productivity.

Small Business Owners

Small business owners who operate stockrooms, retail spaces, or offices can benefit from these shelving systems. They may have limited space and need a versatile storage solution to keep their facilities tidy and well-organized.

Homeowners

Homeowners who want to declutter and organize their spaces, such as garages, sheds, or utility rooms, would find these shelving systems helpful. They provide a way to store tools, equipment, and other items in a neat and accessible manner.

Facility Managers

Facility managers in commercial buildings, office complexes, or community centers could be interested in these shelving systems. They need efficient storage solutions to keep their spaces tidy and accessible to employees, tenants, or visitors.

Retailers

Retailers with storage areas behind the scenes (e.g., backrooms or stockrooms) can benefit from these shelving systems. They help store and organize inventory, making it easier for staff to access products when restocking shelves.

E-commerce Fulfillment Centers

E-commerce companies operating fulfillment centers can utilize these shelving systems to manage inventory efficiently and improve order fulfillment processes.

Event Organizers

Event organizers and planners may need temporary storage solutions for equipment, materials, and supplies for events. The dismountable and customizable features of the shelving systems can be useful for such occasions.

Schools and Educational Institutions

Schools and educational institutions often require storage solutions for textbooks, supplies, and equipment. The shelving systems can help them keep classrooms and storage areas tidy and efficient.

Customer service and support

Our customer service and support team is always ready and available to provide prompt assistance, expert guidance, and effective solutions to address any customer inquiries or concerns.

Customer feedback

“For someone like me who loves to have everything in its place, these shelves have been a game-changer. They've maximized the utilization of space, allowing me to store everything from tools and gardening equipment to seasonal items and holiday decorations”. Eva L.

“We use duty shelving to store everything from office supplies and paperwork to reference materials and even personal items. It's a practical investment that has improved our overall efficiency and work experience”. Roger R.

Ideal for organizing and tidying up your space

Benefits

Versatility: The shelving systems come in a wide range of sizes and finishes, making them suitable for different settings, including homes, garages, sheds, offices, stockrooms, and warehouses. They can accommodate various storage needs and items of different sizes; **Maximized Space Utilization:** provides efficient storage options, allowing users to make the most of their available space and reducing clutter; **Improved Organization:** contributes to better organization. By providing structured and easily accessible storage, they help users keep their spaces tidy and organized, reducing time wasted searching for items; **Optimized Workflow:** In warehouse and stockroom settings, the shelving systems optimize workflow processes. They make it easier for employees to find and retrieve items, leading to improved efficiency and productivity; **Sturdy and Durable:** The solid steel construction with a powder-coated paint finish ensures a sturdy and durable product. The tapered fit design enhances stability, making the shelving systems capable of supporting heavy loads. **Customizable:** The dismountable design allows users to modify the height and length of the shelves. This customizability provides flexibility to adapt the shelving systems to changing needs and different storage requirements; **Easy Installation:** designed for easy installation, making it convenient for users to set them up quickly without complex assembly processes; **Cost-Effective Solution:** They provide long-lasting value and can help avoid the need for expensive built-in storage solutions; **Easy Maintenance:** The powder-coated paint finish not only enhances durability but also makes the shelving systems easy to clean and maintain.

Additional information

Clean and Maintenance: Regular rack cleaning is key to extending its lifespan. You don't always need water; simply keeping it dust-free is sufficient. Too much water can cause surface oxidation, shortening the rack's life. To clean: clear the shelf, start from the top, dust with a soft cloth, rinse sparingly, and dry with a soft cloth. **Remember** the weight capacity of the rack, don't exceed it to prevent accidents.

Manufacturing & Composition: Shelving is manufactured using sustainable practices, including responsible sourcing of raw materials. Steel is **100% recyclable** and can be reused without losing its properties. It can be recycled indefinitely, reducing the demand for raw materials and minimizing waste, and therefore an integral part of the circular economy. The **total recycled content** for the shelving is around **20%**.

Ergonomic usage: Easy-to-assemble, no-screws, ideal for quick storage expansion without the need for tools or professionals. Its innovative modular design is a time and cost-saving solution. The height of the shelves is easily adjustable (in 50mm increments) to accommodate changing requirements.

Product Packaging Circularity: All product packaging components used are made from single homogeneous materials which allow them to be recycled to make new packaging components and therefore the recyclability of the packaging is approximately 100%.

Country of origin: Portugal

Sustainability Metrics

Bi-silque is constantly working to improve itself and therefore the company metrics are dynamic. For this reason, we ask that in case you are interested in knowing more about our sustainability metrics that you please go to our website by clicking on the following link, as these figures are updated regularly here:

<https://www.bisilque.com/sustainability/>

End-of-Life return policy

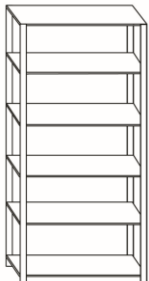

The warranty on this product range is 3 years, having an extended life in comparison to the norm. Additionally, spare parts are available for repair of worn components, so that the product does not have to have an end-of-life, but even so, we accept that the product be returned to Bi-silque, as per Bi-silque's "Take Back" policy.
