Too much screen time can lead to increased exposure to blue light, digital eye strain, and physical discomfort. Help protect your eyes and your screen with the Targus® Antimicrobial Blue Light Filter Screen Protector for 14" Screens. Designed to reduce 45% of harmful blue light while safeguarding your device screen from scratches and fingerprints, the protector also helps reduce glare whether you're working under bright lights or outdoors. Viewing clarity, overall brightness, and touch-sensitivity are not affected.

Ideal for your work-from-home setup or any space where privacy is already secure, this protector offers a 180° viewing angle for full visibility from the left, right, top, or bottom. Highly portable and easy to use, it can be attached in four different ways by using the included reusable adhesive strips, bezel tabs, slide tab guides, or handy flip-over hinge.

For an added benefit, this screen protector features Targus DefenseGuard™ Antimicrobial Protection, which creates a cleaner touchpoint surface and works continuously to prevent the growth of microorganisms. Unlike topically applied sprays, DefenseGuard screen protectors are treated with an antimicrobial additive that does not wear off and lasts for the life of the product.

*Antimicrobial protection is limited to the blue light filter itself.
