

Item number	AW4532 // AW4552 // AW4752
Material	kraft paper
Grammage	90 g/m ²
Roll width (mm)	395, 500
Roll lenght (rm)	100, 250
Colour	nature, white, red, black

Protective material

is the environmentally friendly alternative to bubble wrap.

The honeycomb-like 3D structure interlocks when wrapped and thus guarantees the same product protection of fragile objects during transport as bubble wrap made of plastic. The material is made of 100% die-cut kraft paper and is therefore a particularly environmentally friendly and innovative packaging solution. It is ideal as protective packaging for all fragile objects.

In contrast to bubble wrap, a product packed with this system has a high-quality appearance. This makes it ideal for packaging glassware, ceramics, jewellery and cosmetics.

Match the packaging to your product:
is also available in neutral white, red and black.

This makes each of your packages an eye-catcher.
