

TO WHOM IT MAY CONCERN

When developing products, Maped takes into account the statutory, legal, normative and safety aspects, to launch safe products on the market, fitting the most demanding criteria's.

We keep at our customers' disposal test reports, for products **subject to regulations**, in particular for articles considered as toys, and carrying CE marking, such as:

- Colouring pencils
- Colouring felt pens

These certificates are made by accredited external laboratories.

Besides, in order to guarantee consumers' safety, when there are no existing regulations, Maped launches analysis on:

Our erasers:

- EN 71-3: Migration of certain elements
- Phthalates: Regulation 552/2009 (old directive 2005/84/CE)
- Cadmium: Regulation 552/2009 (old directive 91/338/CE)

Our graphite pencils:

- EN 71-3: Migration of certain elements

These certificates are available on simple request.

All the other Maped products are not considered like toys, Maped commits itself to respect European general's regulations in force, especially:

- General obligation of products (directive 2001/95/EC)
- The REACH regulation (1907/2006/CE)
- Or specific regulation, when this one is available.

*Eg: Ball pens are in accordance with ISO 12757-1
Gel pens are in accordance with ISO 14145-1
The caps and the end-plug of the pens are comply to ISO11540 or BS7272-1&2
The fountain pens respect the requirement defined by JIS S 6025*

The origin of our products is mentioned on the packaging and on the product (when it's possible)

*Eg: Long life felt tips are made in Malaysia
Jungle and Imagine felt tips are made in China*

In the absence of European or International regulations, please give us your legal and regulatory constraints, to obtain from Maped France a proposal concerning specific analysis.
