

Post & base system

Product code: Post01 (post), Post02 (base)

Overview

The Skipper post and base system is the perfect complement to the Skipper unit. Its sleek, professional design looks sublime in any environment, both indoors and outdoors. Sold as a two-part system for improved transport and storage, the base can simply be filled with water or sand for improved strength and stability, then the post is twist-locked into position. The Skipper unit or post & base cap attach to the top of the post with a secure, snap fit.

Key selling points

- Made specifically for the Skipper unit and Skipper waste & safety management range
- An attractive alternative to using standard traffic cones
- Perfect for use in indoor or outdoor environments

Key features

- Each post comes with 2x reflective, high visibility strips
- Pour water or sand into the base for extra stability
- Holds the Skipper unit securely in place

Product FAQs

Q. Can I use a combination of cones and posts?

A. The Skipper post is 1m tall. It's designed to be used with other Skipper posts, but can also be used with traffic cones of the same height.

Q. How heavy is the base once it's filled with water or sand?

A. If using water, the base weighs approximately 12.3kg (27.1lbs) when filled to the maximum level.

Product Specifications (post)

Width: 125mm 4.9"	Height: 1m 39.4"
Depth: 125mm 4.9"	Weight: 1.1kg 39.3oz

Product Specifications (base)

Width: 500mm 19.7"	Height: 125mm 4.9"
Depth: 500mm 19.7"	Weight: 1.2kg 42.5oz

The post twists into the base. The Skipper unit then simply clicks into place on the top of the post with an interference fit.
