

EU and UK power cords included

Targus® 65 W USB Type-C Charger

- Compatible with USB-C laptops, tablets, and phones*
- USB-C Power Delivery (PD) charges USB-C laptops up to 65 W
- Built-in power supply protection: Meticulously tested to ensure safe use with over voltage, over current, and over temperature protection
- PD technology links up with Targus power supply protection to continuously control charging speeds, with the added benefit of maximising your device long term battery health
- Cable management tie for organisation and easy storage with long 1.8 m cable
- EU and UK power cords included, ideal for carrying the AC adapter as a lightweight alternative to the original for travelling
- 2 Year Limited Warranty

Wherever your business travel takes you, whether to the office or to the client, it's essential to be fully charged for the journey. Take the Targus 65 W USB-C PD Charger with you –and keep your USB-C laptop, tablet, or phone topped up*.

The power adapter supports up to 65 W, powerful enough for most laptop devices up to 14 inch**. The power adapter utilises Power Delivery technology and combines with Targus power protection designs to ensure fast and safe charging by optimising charging current at all times. It provides protection against immediate damages due to over current and over heating as well as preserving long term battery health, prolonging the device life.

Compact and lightweight, it also keeps your cords from tangling and neatly stored with the included cable tie.

* Charges most USB-C PD devices

** Can vary depending on laptop device
