

SmartStore™ Vision dry food keeper 3,5 L

SmartStore Vision is a range of stackable and modular dry food keepers. They bring organization to your cupboard, pantry, or kitchen drawer while making efficient use of the space. The transparent containers allow you to see the contents clearly from the side when stored in cabinets and from the top when stored in drawers. The 3,5 liter container is ideal for storing cereals, flours, and other dry goods. You can label the container by writing directly on it with an acrylic pen; the text is smudge-proof and easily removable by washing. Made in Finland. Dishwasher-safe.
