

SmartStore™ Vision dry food keeper 1,45 L

SmartStore Vision is a range of stackable and modular dry food keepers. They bring organization to your cupboard, pantry, or kitchen drawer while making efficient use of the space. The transparent containers allow you to see the contents clearly from the side when stored in cabinets and from the top when stored in drawers. The round 1,45 liter container is ideal for storing pasta, granola, and other dry goods. Its screw-top lid is simple to open and close. You can label the container by writing directly on it with an acrylic pen; the text is smudge-proof and easily removable by washing. Made in Finland, with 20 % renewable content (allocated via ISCC mass balance approach). Dishwasher-safe.
