

## GP410 - Poly General Purpose Absorbents - Light Weight Pads

### Specification

Made from virgin resin polypropylene, our absorbents do not have recycled content that can compromise strength and chemical resistance.

The heat welded dimples make sure you turn your liquid hazard into an easily managed solid fast.

The spun bonded laminate provides extra strength and prevents shedding.

They are suitable to use with a wide range of chemicals including hydrocarbons, agricultural chemicals, coolant and even battery acid.

- Super absorbent polypropylene micro-fibres suitable for all non-aggressive chemicals.
- Can also be used with some acids and bases including battery acid.
- General purpose absorbents are made from 100% virgin resin polypropylene.
- Contains no recycled contaminants that can reduce strength, absorption and chemical resistance.
- All pads and rolls are laminated with low-lint spun woven cover stock.
- Pads and rolls in this range have heat bonded dimples for fast absorption.
- Pads are perforated to reduce use for small spills.
- The easy-tear perforation on all rolls make them convenient to use. Just tear off what you need.
- Colour coded grey for easy recognition and fast response.
- Dispensing boxes available at additional cost.
